F 0552		es dated from 6/2/22 and 6/3/22 indicated by licensed staff regarding the risks	•
Level of Harm - Minimal harm or potential for actual harm		contacted regarding his repeated refus	
Residents Affected - Few	started ' Aricept ' per episode of for	nt Care Conference Review, dated 3/4/ getfulness (per resident)/dementia. Fu whether Resident 12 elected to attend	rther review of this document did
	A review of Resident 12's clinical record did not show any documentation or clinical work up from the physician or any other provider supporting a diagnosis of dementia such as any record of checking memory, language, visual perception, attention, problem-solving, movement, senses, balance, reflexes, or other neurological work up.		
	During an observation and concurrent interview on 6/9/22 at 1:06 PM., in Resident 12 's room, Resident 2 was observed sitting up in his wheelchair in his room responding to questions and was alert and oriented person, place, time, and activity. Resident 12 stated he was never invited to participate in any care conference concerning his care since after he was first admitted. Resident 12 stated he was not invited to attend the IDT team meeting regarding his care held on 3/4/22 which included the discussion of adding Aricept to his medication regimen. Resident 12 stated he did not ask for Aricept due to forgetfulness and doesn't even know what Aricept is. Resident 12 stated he was never evaluated by the physician in perso or remotely concerning the diagnosis of dementia and to his knowledge no other medical workup was don regarding his episode of forgetfulness. Resident 12 stated that it was not uncommon at this facility for residents to be started on medications without having been properly educated or evaluated by medical staregarding their use. Resident 12 stated neither MD nor any other facility staff educated him on the risks or benefits of taking Aricept before they started giving it to him. Resident 12 stated he may forget something occasionally but it's not uncommon for someone almost [AGE] years old to forget something from time to time. Resident 12 stated, I don't have dementia and don't have any trouble remembering who other ped are, who I am, or where I am.		
	During an interview on 6/10/22 at 10:59 AM., with Registered Nurse Supervisor (RN 1) stated prior to his care conference on 3/4/22, Resident 12 had an episode where he slid out of his wheelchair while out on pas to his methadone (a medication used to treat pain) clinic. RN 1 stated Resident 12 expressed that he was having moments of forgetfulness and requested medication for it. RN 1 stated MD was contacted regarding his request, and she added a diagnosis of dementia and prescribed Aricept over the phone. RN 1 stated she was unsure whether the resident was invited to participate in that care conference, but it is important to ensure the resident was informed about the risks and benefits of the treatment options to ensure he or she has the right to refuse the medication if he or she chose to.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		on)	
F 0554 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Allow residents to self-administer drugs if determined clinically appropriate. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40994 Based on observation, interview, and record review, the facility failed to ensure one of 12 sampled residents (Resident 12) was not allowed or required to self-administer medications without the required prior approval. The deficient practice of allowing Resident 12 to self-administer his medications without the required prior approval increased the risk that Resident 12 and other residents could have incorrectly administered medications leading to possible medical complications and an overall diminished quality of life. Findings: During a telephone interview on 6/7/22 at 2:33 PM, the Facility Monitor (FM) stated he observed Resident 12 on 6/2/22 at approximately 12:28 PM on the facility 's patio holding a plastic medication cup containing six medications (identified at Aricept [a medication used to treat memory loss], valsartan [a medication used to treat high blood pressure], Cymbalta [a medication used to treat nerve pain], finasteride [a medication used to treat nerve pain]). The FM stated Resident 12 indicated he had just received these medication used to treat nerve pain]). The FM stated Resident 12 indicated he had just received these medication surd to vitamin c (a vitamin supplement). The FM stated, according to the June 2022 MAR, LVN 9 documented six medications as administered around 10:30 AM on 6/2/22 (Aricept, valsartan, Cymbalta, finasteride, multivitamin and vitamin c). The FM stated during his observation of Resident 12 earlier that day, Resident 12 was asleep at that time and LVN 9 documented gabapentin and Norco were administered around 12:18 PM and 12:20 PM, respectively that day. The FM stated those medications were still in the medication cup along with the others when FM observed Resident 12 on the patio with the resident rather than administering them to him. The FM stated LVN 9 eventually responded she left them alone with Reside			
	explanation for the inaccuracy in the documentation. The FM stated most likely LVN 9 medications around 10:30 AM, found that the resident was asleep, locked them in the medication cart intending to give them to the resident later, and then documented in the medications had been given at that time when in fact they had not. A review of Resident 12 's Admission Record, dated 6/9/22, indicated he was origina facility on [DATE] and readmitted [DATE] with diagnoses including essential hyperten pressure) and unspecified dementia without behavioral disturbance (a group of medic characterized by impairment of at least two brain functions such as memory and judged A review of the Physician's Order Summary Report, dated 6/9/22, indicated all current clinician administered and there was no separate physician order authorizing the self-medications.		was originally admitted to the ial hypertension (high blood buy of medical conditions bry and judgement.

F 0554 Level of Harm - Minimal harm or potential for actual harm	A review of Resident 12 's Self-Administration of Medication Assessment Record, dated 3/15/22, indicated Prefers LN (licensed nurse) to administer medication at this time. A review of Resident 12 's clinical record indicated no documentation of an Interdisciplinary Team (IDT - a				
Residents Affected - Few		reas of expertise who meet quarterly to inistration of medication or a resident o			
	During an observation and concurrent interview on 6/9/22 at 1:06 PM with Resident 12 in is room, Resident 12 was observed sitting up in his wheelchair in his room. Resident 12 stated when the licensed nurses provide his medications, they commonly leave his medications in the dosage cup at his bedside. Resident 12 stated he knows the proper protocol for administering medications was to stay with him while he takes them but says the nurses were probably frustrated that I take a long time to swallow them due to my [other medica conditions] and I know they have a lot of work to do. Resident 12 stated on 6/2/22, LVN 9 brought his medications to him while he was on the patio and left without watching him taken them all. A review of the June 2022 nursing schedule indicated LVN 9 was not scheduled for the rest of the month as				
	unreturned at this time of this writing		Ç		
	During an interview on 6/10/22 at 10:59 AM, Registered Nurse Supervisor (RN 1) stated for a resident to self-administer medications, there would need to be an IDT approval and a physician order allowing self-administration in place prior to allowing the resident to self-administer. RN 1 stated Resident 12 did not have the approval to self-administer medications and his self-administration assessment, dated 3/15/22, indicated his medications must be given by a licensed nurse. RN 1 stated that all of Resident 12 's medication orders indicated they were to be clinician administered. RN 1 stated, when administering pills, the licensed nurse was required to verify, in person, that the resident takes all of the medications before documenting them in the MAR. RN 1 stated licensed nurses cannot leave the pills with the resident at bedside or anyplace else unsupervised. RN 1 stated that if medications were left at the bedside without prior approval, the medical record regarding medications taken may be inaccurate if the resident did not actually take them all. RN 1 stated the nurse administering the medication would not know if the resident refused any of the medication and would not be able to document accurately.				
	A review of the facility 's policy titled, Self-Administration of Medications, reviewed January 2022, indicated residents have the right to self-administer medication if the interdisciplinary team had determined that it was clinically appropriate and safe for the resident to do so. If it was deemed safe and appropriate for a resident to self-administer medications, this was documented in the medical record and the care plan.

F 0600	Protect each resident from all types and neglect by anybody.	s of abuse such as physical, mental, se	xual abuse, physical punishment,
Level of Harm - Immediate jeopardy to resident health or safety	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 40994
Residents Affected - Some	Based on observation, interview, and record review, the facility failed to provide required care and services according to current standards of practice by failing to ensure multiple licensed staff, including Licensed Vocational Nurses 1, 7 and 8 (LVN) measured blood sugar levels according to physician's orders and care plans for seven of 11 sampled residents receiving sliding scale (dose of insulin [a medication used to treat high blood sugar] dependent on blood sugar readings taken immediately before administration) insulin between 1/1/22 and 3/31/22. The deficient practice of failing to check blood sugar levels as required by the physician's order and care plan, prior to administering insulin, could have caused Resident 1, 2, 3, 4, 5, 6 and 7's (Residents 1 - 7) blood sugar levels to drop dangerously low, likely leading to overall diminished quality of life, hospitalizatio or death. On 6/9/2022 at 11:11 AM, an Immediate Jeopardy (IJ, a situation in which the facility's noncompliance with one or more requirements of participation has caused, or is likely to cause, serious injury, harm, impairmer or death to a resident) was identified in the presence of the facility's Administrator (ADM) and Director of Nursing (DON) regarding the facility's failure to ensure blood sugar levels were checked prior to administering insulin as required by the physician's order and failure to provide required care and services Residents 1-7 by failing to check their blood sugar as required by their physician's orders and care plans. On 6/10/22 at 3:23 PM, while onsite at the facility, the IJ was removed after the facility submitted an acceptable removal plan (interventions to correct the deficient practices), which was verified and confirmed through observation, interview and record review. The IJ situation was removed in the presence of the ADI and the DON. The accepted removal plan included the following actions:		
		ant reeducated licensed staff regarding rvices to prevent physical harm by ensuto administering insulin.	
	2. Facility staff identified a total of 17 residents currently in the facility with a physician's order to check blood sugar prior to administering sliding scale insulin, reviewed their Medication Administration Records (MAR) for duplicate blood sugar entries between 6/1/2022 and 6/9/2022, and found no additional duplicate blood sugar levels.		
	3. On 6/9/2022, the Pharmacist Co the following topics:	nsultant (PC) conducted educational tr	aining with licensed staff regarding
	A. Obtaining a fingerstick glucose (sugar) level	
	B. Importance of accuracy and inte	grity of medical records	
	C. Importance of measuring blood sugar level per physician's order prior to administering insulin based on a sliding scale dosing regimen.

F 0757 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	A review of Resident 12 's clinical record did not show any documentation or clinical work up from MD or any other provider supporting a diagnosis of dementia such as any record of checking memory, language, visual perception, attention, problem-solving, movement, senses, balance, reflexes, or other neurological work up. During a concurrent observation and interview on 6/9/22 at 1:06 PM in Resident 12 's room, Resident 12 was observed sitting up in his wheelchair in his room responding to questions and was alert and oriented to		
	he was first admitted . Resident 12 stated he was not invited to attend the IDT team meeting regcare held on 3/4/22 which included the discussion of adding Aricept to his medication regimen. Fixed the did not ask for Aricept due to forgetfulness and doesn't even know what Aricept is. Restated he was never evaluated by MD in person or remotely concerning the diagnosis of dement knowledge no other medical workup was done regarding his episode of forgetfulness. Resident that it was not uncommon at this facility for residents to be started on medications without having properly educated or evaluated by medical staff regarding their use. Resident 12 stated neither other facility staff educated him on the risks or benefits of taking Aricept before they started givin Resident 12 stated he may forget something occasionally but it's not uncommon for someone a years old to forget something from time to time. Resident 12 stated I don't have dementia and cany trouble remembering who other people are, who I am, or where I am. During an interview on 6/10/22 at 10:59 AM with the Registered Nurse Supervisor (RN 1), RN 1 to his care conference on 3/4/22, Resident 12 had an episode where he slid out of his wheelchai on pass to his methadone (a medication used to treat pain) clinic. RN 1 stated Resident 12 express he was having moments of forgetfulness and requested medication for it. RN 1 stated MD was or regarding his request, and she added a diagnosis of dementia and prescribed Aricept over the p stated she was unsure whether the resident was invited to participate in that care conference, bu important to ensure they are informed about the risks and benefits of their treatment options to e have the right to refuse them if they choose.		
	she was responsible for coordinatir meeting on 3/4/22 was misdated. It started on 3/15/22 as it discussed that attending this care conference, but Aricept was started pursuant to a tenin person for dementia prior to order this resident was educated on the radministered. During a telephone interview on 6/1	10/22 at 11:14 AM with the Minimum Data Set Nurse 1 (MDSN 1), MDSN 1 stated coordinating the resident care conferences. MDSN 1 stated Resident 12 's IDT isdated. MDSN 1 stated this conference happened after the Aricept was already iscussed the ongoing Aricept therapy. MDSN 1 stated the resident opted out of rence, but he usually comes to them when they involve incidents. MDS stated the lant to a telephone order from MD. MDSN 1 stated MD did not evaluate this resident ior to ordering this medication. MDSN 1 stated she could find no written record that ad on the risks and benefits of Aricept before the medication was prescribed or riew on 6/10/22 at 11:29 AM with MD, MD stated she was the primary attending	
	think he has dementia. MD stated s name was on the order. F 0760 Level of Harm - Immediate jeopardy to resident health or safety	4. On 6/9/2022, the Medical Director (MD) reviewed the blood sugar readings of all 17 residents with physician's orders to check blood sugar prior to administering sliding scale insulin. On 6/10/2022, the Physician personally assessed residents affected by the duplication of blood sugar readings for any adverse effect.			
Residents Affected - Some	5. On 6/9/2022, facility staff notified affected by duplicate blood sugar r	d the respective primary care physician eadings.	s of all residents found to be	
	6. On 6/9/2022, the DON and/or the Quality Assurance Nurse will audit eight residents three times weekly to ensure licensed staff were checking blood sugar levels prior to administering sliding scale insulin.			
		he implementation of the plan and will nent findings in quarterly quality assuran		
	Findings:			
	During a telephone interview on 6/7/2022 at 2:33 PM, the Facility Monitor (FM) stated Residents 1, 2, and 3 have multiple identical blood sugar readings documented for insulin administration dated between January and March 2022. The FM stated multiple nurses documented the same blood sugar readings multiple times throughout the day, on multiple days and for multiple residents. The FM stated many of the duplicate readings were used to determine the dose of sliding scale insulin and insulin was administered as a result.			
	A review of Resident 1's Admission Record, dated 6/9/2022, indicated he was originally admitted to the facility on [DATE] and readmitted on [DATE] with diagnoses including: Type II diabetes mellitus (impairment in the way the body regulates and uses sugar [glucose] as a fuel).			
	A review of the Physician's Order S Resident 1's insulin:	Summary Report, dated 6/9/2022, indic	ated the following active orders for	
	-On 3/3/22, Resident 1's physician prescribed insulin lispro (a fast-acting form of insulin) to inject three units (a unit of dosage for insulin) subcutaneously (under the skin) three times a day for Type II diabetes with instructions to hold if the blood sugar value is less than 120 milligrams ([ml] - a unit of measurement for mass) per deciliter ([dl] - a unit of measurement for volume).			
	-On 3/3/2022, Resident 1's physician prescribed insulin lispro to inject as per sliding scale: if blood sugar (BS) = 71-150, no coverage, 151-200 = 3 units, 201-250 = 5 units, 251-300 = 7 units, 301-350 = 9 units, 351-400 = 11 units, more than 400 = 13 units subcutaneously before meals and at bedtime for Type II diabetes.			
	-On 4/21/2022, Resident 1's physic subcutaneously in the morning for	cian prescribed insulin glargine (a slow- Type II diabetes.	acting insulin) to inject 30 units	
	A review of Resident 1's Resident Care Plan for diabetes, last updated April 2022, indicated he was at risk for hypoglycemia (low blood sugar) and hyperglycemia (high blood sugar) due to diabetes with an approach plan to Accucheck (take blood sugar measurement) as ordered QID (four times daily) AC (before meals) an QHS (at bedtime).

F 0835	Administer the facility in a manner t	that enables it to use its resources effe	ctively and efficiently.
Level of Harm - Minimal harm or potential for actual harm	40994		
Residents Affected - Few	Based on interview and record review, the facility administration failed to seek timely guidance from the medical director regarding duplicated blood sugar readings in 7 of 11 sampled residents (Resident 1, 2, 3, 4, 5,6 and 7) between January and March 2022.		
	The deficient practice of failing to seek timely guidance from the medical director on reports of duplicated blood sugars could have caused Residents 1-7 to continue to receive substandard quality of care resulting in possibly medical complications and diminished quality of life.		
	Findings:		
	During a telephone interview on 6/7/22 at 2:33 PM with the Facility Monitor (FM), The FM stated Residents 1, 2, and 3 had multiple identical blood sugar readings documented for insulin administration between January and March 2022. The FM stated multiple nurses documented the same blood sugar readings multiple times throughout the day, on multiple days and for multiple residents. The FM stated many of the duplicate readings were used to determine the dose of sliding scale insulin and insulin was administered as a result. The FM stated he informed the Director of Nursing (DON) of these findings while conducting an onsite visit on 3/24/22 and 3/25/22 and sent a follow up email to the DON and the Administrator (ADM) detailing the findings on 4/5/22.		
	A review of Resident 1-7's Medication Administration Records (MAR - a record of all medications administered, and monitoring done for a resident) between January and March 2022 indicated a total of 303 total duplicate blood sugar readings documented by multiple licensed staff.		
	During a telephone interview on 6/10/22 at 11:29 AM with the Medical Director (MD), the MD stated she is this facility's medical director and her duties in that role involve bridging the gaps in resident care by liaising with other physicians and attending the facility's regular quality assurance meetings. The MD stated she regularly attends monthly quality assurance meetings in person, but many times the meetings are canceled due to emergencies or scheduling conflicts. The MD stated many times she must leave the meetings early to attend to other patient's medical needs or must excuse herself from the meetings to take phone calls while they are ongoing. The MD stated she was never made aware of the issue of duplicated blood sugar readings in residents receiving insulin until the DON informed her on 6/9/22. The MD stated she did not recall any meeting since March or afterward where this issue was discussed in a quality assurance meeting when she was present.		
	A review of the facility document Summary of Quarterly Quality Assurance Meeting dated April 27, 2022, indicated Similarities and possibilities of duplication of vital signs was a quality assurance agenda item discussed at this meeting.		
	A review of the facility document QAA Meeting - Quarterly in-service record/QAPI, dated 4/27/22, indicated the MD signed the attendance sheet for this meeting as the Director of Medical Services.

F 0880 Level of Harm - Minimal harm or	·	Provide and implement an infection prevention and control program. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 43261		
potential for actual harm Residents Affected - Some	Based on observation, interview and record review, the facility failed to maintain an infection control prevention and control program to prevent COVID-19 (a deadly respiratory disease transmitted from person to person) by failing to ensure all staff were properly fit tested with N95 mask (respirators that filters at least 95 percent (%) of airborne particles) for five of five facility staff (Certified Nurse Assistant 1-CNA 1, Certified Nurse Assistant 10-CNA 10, Certified Nurse Assistant 11-CNA 11, Restorative Nurse Assistant 1-RNA 1 and Registered Nurse 2-RN 2). This deficient practice can place residents and staff at risk for exposure and contracting COVID-19.			
	Findings:			
	During an observation and concurrent interview on 6/8/2022 at 1:35 p.m., CNA 1 was observed wearing a [NAME] L-188/TC-84A-6973 (type of N95 mask). CNA 1 verified the type and stated that she was not fit tested for that specific type of N95 mask. She also stated that she was currently working at the yellow zone (area in the facility for residents under investigation for possible COVID-19 infection) room.			
	A review of facility 's nursing staffing assignment and sign-in sheet dated 6/8/2022 and 6/9/2022, indicated CNA 1 was assigned to a resident in a yellow zone room.			
	A review of facility 's N95 tracking	list dated 6/8/2022, indicated missing of	date of N95 fit test to CNA 1.	
	During an interview with RNA 1 on 6/8/2022 at 2:12 p.m., RNA 1 stated that the last time he was N95 fit tested was two years ago.			
	A review of facility 's N95 tracking	list dated 6/8/2022, indicated RNA 1 w	as fit tested on [DATE].	
	During a concurrent observation and interview with CNA 10 on 6/8/2022 at 7:55 p.m., CNA 10 stated a verified that he was wearing a [NAME] L-188/TC-84A-6973. CNA 10 stated that he was not fit tested for same N95 mask. He also stated that since the facility had only one N95 mask, he did not have any choose to use it for his own protection.			
	A review of facility 's N95 tracking	list dated 6/8/2022, indicated missing of	date of N95 fit test to CNA 10.	
	During a concurrent observation and interview with CNA 11 on 6/9/2022 at 6:35 a.m., CNA wearing BYD (type of N95 mask). CNA 11 verified and stated that he used his own N95 mask that he was not fit tested for any N95 mask.			
	A review of facility 's N95 tracking	list dated 6/8/2022, indicated missing of	date of N95 fit test to CNA 11.
