F 0697	Interviews		
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	The director of nurses (DON) was interviewed on 12/18/19 2:31 p.m.The DON said a complete pa assessment was to be completed on admission, quarterly and on a change of condition. She said assessment needed to be completed even if the resident was on a pain regimen. She said the pai was to ask every shift. She said it needed to be documented on the MAR. She confirmed the lates assessment was done over a year ago on 9/10/18 and the resident 's pain tolerance was marked		
	The licensed practical nurse (LPN) #6 was interviewed on 12/18/19 at 10:08 a.m. The LPN said the resident complained of pain in his knees and also pain from his arthritis. She said that there were no non-pharmaceutical interventions used. She said the resident 's pain tolerance was 4 out of 10. She said he did not take the PRN hydrocodone as he did not like how it made him too sleepy.

Level of Harm - Minimal harm or potential for actual harm	Test tray			
Residents Affected - Some	On 12/16/19 at 6:05 p.m., the regular diet test tray was evaluated. The meal was served on a serving tr with a dome over the plate holding the chicken, carrots, and the orzo. There was no plate warmer unde plate.			
		The country smothered chicken was cool to the palate at 106.8 degrees F and dry to the taste with not much flavor. The gravy was lumpy and solidified.		
	-The herbed orzo was cool to the palate at 118.9 degrees F and was over cooked and was bland in taste.			
	-The sliced carrots were cool to the palate at 103.8 degrees F with no taste of butter.			
	Staff interviews			
	The dietary manager (DM) was interviewed on 12/16/19 at 5:30 p.m. He said the food would stay warmer if the facility would provide them with better cabinets to keep the food warm. He said if the pellet warmers were working, they would help keep the food warm as well.			
	DM said residents would say the ki the temperatures at a palatable lev dining room caused the cold air to putting it on the plate. He said the 0	dietary supervisor (DS) were interview tchen could improve on the food taste el has been a problem for the facility. H bass over the serving line and was coo CNAs that are serving the food should ting the residents tray out and shutting	and temperatures. He said keeping le said the draft coming from the ling the food immediately when be moving the food cabinet from	
	warmers. He said someone came of turned it on and tried to use it he no	the food warmer but he is waiting for so but to fix the plate warmer and said it w bticed it was not fixed and only one cor er were getting warm enough to mainta	as fixed. The DM said when he npartment slightly worked. He said

F 0880	Provide and implement an infection prevention and control program.				
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 42161				
Residents Affected - Some	Based on observations and interviews the facility failed to ensure infection control practices were followed to prevent the spread of infection.				
	Specifically, the facility failed to ensure:				
	- Proper care and storage of oxygen equipment, nasal cannulas.				
	- Cleaning of call light cords and bathroom environment and equipment.				
	Findings include:				
	Observations and staff interviews				
	On 12/12/19 at 9:00 a.m. and on 12/16/19 at 2:30 p.m. during the environmental tour with the maintenance director (MTD), maintenance assistant (MA) #1, housekeeping manager (HSM), and regional clinical representative who was the interim infection preventionist, and the nursing home administrator (NHA). The following observations were made:				
	- room [ROOM NUMBER] had black substance in the caulking on the floor around the toilet.				
	- Rooms #503, #704, #801, #802, #803, #807, #1102, #1106, #1108, #1204, #1207, #1308, #1403, #1606, #1610, and #1701 all had brown substance on call light pull cords in the residents bathrooms.				
	- Rooms #1204, #1509, #1510, had oxygen nasal cannula lying on the floor and not stored appropriately.				
	- room [ROOM NUMBER] had a temporary support beam next to the toilet with duct taped padding that was not a cleanable surface wrapped around it and there were deep scrapes in the toilet seat.				
	The MTD said the pull cords were cleaned on a monthly basis. He said the pull cords could not touch the floor or be too short. He said he did not think about cleaning the pull cords before. He said he was going to buy a roll of cord to replace all of the pull cords.				
	The MTD said for room [ROOM NUMBER] he was going to send someone in to clean the floor around the toilet and if it could not be cleaned then he would replace the tiles.				
	The HSM said he would send someone in #501 right away. He said he did not know the pull cords should be cleaned regularly.				
	The regional clinical representative who was the interim infection preventionist said the nasal cannula should have been stored in the plastic medical bags hanging on the oxygen concentrator. She said that in rooms #1204, #1509, and #1510 she had a certified nurses assistant (CNA) replace the nasal cannulas and place them in the bags. She said she was going to perform a staff training on how to properly store the nasal cannulas and what to do if they were found not in the storage bags.

F 0880	Facility follow-up					
Level of Harm - Minimal harm or potential for actual harm	The MTD was interviewed again on 12/17/19 at 9:35 a.m. He said the MA #1 and himself were working on replacing all of the pull cords in the facility. He said most of them were already replaced and finished. He said					
Residents Affected - Some	he replaced the support bar in room [ROOM NUMBER] in the restroom. He said the MA #1 was spending his day fixing the problems in the rooms and replacing bathroom call light pull cords. He said he had the HSM add bathroom call light cords to their daily cleaning log. He said the new call light pull cords had a plastic sleeve around them which made them a cleanable surface. He said he made one of them dirty then cleaned it to see if it came all the way clean with success.
