Residents Affected - Few		ew and interview, the facility failed to en neostomy residents reviewed. (Residen		
	Findings include:			
	1. On 4/12/22 at 2:15 p.m., Resident K was observed in bed, he was awake, alert and oriented, and indicated he had been in the facility since last Thursday. The resident was observed with a tracheostomy and an oxygen mask over the trach, there was no drain sponge noted around the trach. The resident indicated it had fallen off a couple of days ago and no staff person had replaced it. He lived at home with his wife and has had a tracheostomy for the last [AGE] years, so he was very familiar with what needed to be done on a daily basis. He was able to cough up a lot of the sputum on his own, however, there was a suctioning device set up for him to do his own suctioning. The resident indicated trach care had only been completed one time since admission. There was a box of supplies on top of the table and inside the drawer, there were 2 boxes of inner cannulas, many suctioning kits, and 2 spare tracheostomies. The record for Resident K was reviewed on 4/12/22 at 3:00 p.m. Diagnoses included, but were not limited to, COPD (chronic obstructive pulmonary disease), congestive heart failure, type 2 diabetes, chronic respiratory failure, cellulitis right and left lower limbs, high blood pressure, chronic kidney disease, tracheostomy status, and asthma. The Admission Minimum Data Set (MDS) was still in process. A Nurses' Note, dated 4/8/22 at 2:39 p.m., indicated the resident was alert and oriented times 3 and was able to make needs known. The Respiratory Therapist was in the facility and set up the resident for the tracheostomy supplies.			
	A Respiratory Note, dated 4/9/22 at 3:59 p.m., indicated a request to set up equipment for 0.28 trach collar. Compressor and concentrator set up and all supplies reviewed. Current supplies were present for trach collar, suction, nebulizer and trach care. Set up yanker (a device used for suctioning) for resident to use in order to keep mouth clear. Trach care was completed and reviewed all processes with nursing. Resident wa a long term trach patient. Physician's Orders, dated 4/7/22, indicated tracheostomy care and suctioning every shift and prn (as			
		cannula daily. Change trach ties week		
	The Medication Administration Record (MAR), dated 4/2022, indicated the tracheostomy care and suctioning was not signed out as being completed for the day shift on 4/10 and 4/11. The trach care for the evening shift was not signed out as completed on 4/8-4/10/22. Trach care was not signed out as being completed on the midnight shift from 4/8-4/11/22.			
	The 4/2022 MAR for changing the inner cannula daily indicated it had been signed out as being completed 4/8, 4/9, 4/10, and 4/12/22. There were no initials on 4/11/22 to indicate it had been completed. The trach ties were not signed out as being completed on 4/11/22.

F 0760	Ensure that residents are free from	significant medication errors.		
Level of Harm - Immediate jeopardy to resident health or	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 10326	
safety Residents Affected - Few	Based on observation, record review and interview, the facility failed to ensure residents were free of any significant medication errors related to not receiving anticoagulant (blood thinner) medications which resu in a re-hospitalization for pulmonary emboli (blood clots in lungs) and new onset cardiomegaly (enlarged heart) for 2 of 3 residents reviewed for anticoagulant use. (Residents F and R) The facility also failed to ensure insulin and intravenous (IV) antibiotics were administered for 2 of 4 residents reviewed for unnecessary medications. (Residents F and D) The immediate jeopardy began on 3/5/22 when the resident's anticoagulant was not delivered to the facility after admission from the hospital. The pharmacy had contacted the facility on 3/6 and 3/10/22 for a clarification order with no response from facility staff. On 3/10 and 3/14/22, the resident had complaints of chest pain and shortness of breath. The resident was sent out 911 on 3/14/22 after an abnormal EKG and was admitted to the hospital with bilateral large pulmonary emboli with new onset cardiomegaly. The Administrator was notified of the immediate jeopardy at 11:00 a.m. on 4/14/22.			
	Findings include:			
	1. The closed record for Resident F was reviewed on 4/12/22 at 11:35 a.m. Diagnoses included, but were not limited to, multiple subsegmental pulmonary emboli (blood clots in the lung) without acute cor pulmonale (a condition that causes the right side of the heart to fail), type 2 diabetes, and peripheral vascular disease. The resident was admitted to the facility on [DATE].			
	a. Prior to admission, Resident F was hospitalized from 1/31/22 to 3/4/22 for bilateral pulmonary with large saddle embolus, right heel osteomyelitis (bone infection), and COVID-19 pneumonia.			
	The Admission Minimum Data Set intact and required extensive assis	(MDS) assessment, dated 3/10/22, ind tance with bed mobility.	icated the resident was cognitively	
		indicated the resident was to receive E 112.5 mg subcutaneous daily. The orde		
	A Physician's Order, dated 3/12/22 mouth twice a day.	, indicated the resident was to receive	Eliquis (a blood thinner) 5 mg by	
	The March 2022 Medication Administration Record (MAR) was not available for review. The Administrator indicated the Diabetic Flowsheet was found but not the MAR with the resident's other medications.			
	Interview with the Pharmacist on 4/13/22 at 4:41 p.m., indicated the resident's Enoxaparin had not been s to the facility due to a clarification order being needed. On 3/6/22, the Pharmacist spoke with LPN 1, indicating a clarification order needed to be obtained. He indicated he never received a response from the facility. On 3/10/22, another Pharmacist spoke with RN 1 and indicated a clarification order for the Enoxaparin needed to be obtained so it could be sent to the facility. The Pharmacy received no response from the facility.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0760 Level of Harm - Immediate jeopardy to resident health or safety	Nurse Practitioner (NP) Progress Notes, dated 3/10/22 at 4:15 p.m., indicated the resident had reported midsternal chest pain without radiation or changes with breathing. The resident denied nausea, dizziness, or headache. At that time, the resident did not appear to be in any distress. No other needs, wants, or concerns were expressed.		
Residents Affected - Few	NP Progress Notes, dated 3/14/22 with a time stamp of 5:32 p.m., indicated the resident had her EKG that day. The resident continued to complain of chest pain and some shortness of breath (SOB). STAT EKG results were abnormal. Continued complaints of midsternal chest pain with occasional SOB. Discussed results with Physician. Sending resident out for further evaluation to determine if resident was having an active MI (heart attack). No abdominal pain or fevers were noted per nursing report. At that time, the resident did not appear to be in any distress. No other needs, wants, or concerns were expressed. Breath sounds clear but diminished to bilateral bases.		
	The resident was sent out 911 on 3/14/22 at 4:00 p.m.		
	The Hospital Admission Note, dated 3/14/22, indicated the resident was a recent admission for bilateral pulmonary emboli on full dose Lovenox (a blood thinner). The repeat CT scan redemonstrated bilateral pulmonary emboli with infiltrates.		
	On 3/14/22, CT Chest Angiography with MIP Imaging showed, bilateral large pulmonary emboli with cardiomegaly. Diffuse consolidative infiltrates bilaterally with small bibasilar effusions. Cardiomegaly is identified.		
	The cardiomegaly (enlarged heart) was new onset.		
	A two view Chest X-Ray Report, co the resident's heart size was gross	ompleted on 1/31/22 during the residen ly within normal limits.	t's previous hospital stay, indicated
		4/13/22 at 4:45 p.m., indicated the res in should have been received as order arding the clarification order.	
	b. Resident F had a Physician's Order, dated 3/4/22, which indicated blood glucose monitoring was to be done four times a day. The Physician was to be notified if the resident's blood sugar was less than 60 or greater than 400.		
	The March 2022 Insulin/Diabetic Flowsheet, indicated the resident's blood sugar was not monitored on the following dates and times:		
	- 3/6/22 at 12:00 p.m. and 8:00 p.m.		
	- 3/8/22 at 8:00 a.m., 12:00 p.m., a	nd 8:00 p.m.	
	- 3/10/22 at 8:00 a.m.		
	A Physician's Order, dated 3/4/22, units subcutaneously daily.	indicated the resident was to receive T	resiba Flex Touch insulin pen 50

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0760	The March 2022 Insulin/Diabetic Flowsheet, indicated the Tresiba insulin was not given as ordered at 8:00 a. m. on 3/6, 3/8, and 3/13/22. A Physician's Order, dated 3/4/22, indicated the resident was to receive Novolog insulin, 27 units three times a day (tid).		
Level of Harm - Immediate jeopardy to resident health or safety			
Residents Affected - Few	The March 2022 Insulin/Diabetic Flowsheet, indicated the Novolog insulin was not given as ordered at 8:00 a. m. on 3/6, 3/8, and 3/13/22. The 12:00 p.m. dose of insulin was not given on 3/8 and 3/13/22.		
	Interview with the Director of Nursing on 4/14/22 at 2:20 p.m., indicated the insulin should have been given as ordered. He also indicated the resident's blood sugar should have been monitored as ordered.		
	10770		
	The record for Resident D was reviewed on 4/13/22 at 9:45 a.m. Diagnoses included, but were not limited to, status post pancreatosplenectomy due to abscess on abdominal wall.		
	The resident was sent out to the hospital on 1/27/22 and returned on 2/8/22 at 2:32 p.m. At that time, he had his pancreas and spleen removed.		
	The Quarterly Minimum Data Set (MDS) assessment, dated 2/14/22, indicated the resident was cognitively intact and had major surgery for removal of the spleen. In the last 7 days, he had 5 doses of an antibiotic medication. A Nurses' Note, dated 2/8/22 at 2:45 p.m., indicated during report from another nurse, it was stated this resident was on IV (intravenous) Zosyn (an antibiotic), the order could not be found on the medication list from the hospital, also the resident had new allergies to Zosyn per the discharge papers. The nurse called admissions asking if they had the current medication list to see what antibiotic the resident was supposed to be on and were awaiting a call back.		
	Nurses' Notes, dated 2/9/22 at 5:49 a.m., indicated an order for Zosyn every 8 hours x 28 days confirmed with admissions and Physician. If side effects such as itching or rash occur, reach out to Physician for order to cope with effects.		
	Physician's Orders, dated 2/9/22, indicated Piperacillin-Tazobactam (Zosyn) 3.375 grams, 1 bag IV every 8 hours times 28 days. Administration times were 12:00 a.m., 8:00 a.m., and 4:00 p.m.		
	The Medication Administration Record (MAR) for 2/2022 and 3/2022, indicated the IV antibiotic was not signed out as being administered on the following dates and times: - 12:00 a.m. on 2/10, 2/17, 2/28, and 3/8/22		
	- 8:00 a.m. on 2/9, 2/10, 2/13, 2/25, 2/26, 2/27, 2/28, 3/3, 3/4, and 3/7/22		
	- 4:00 p.m. on 2/9, 2/10, 2/13, 2/14, 2/15, 2/16, 2/26, 2/27, 2/28, 3/5, 3/6, and 3/7/22

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0760 Level of Harm - Immediate jeopardy to resident health or safety	Interview with the Director of Nursing on 4/13/22 at 2:15 p.m., indicated the Zosyn was not given when the resident came back from the hospital due to a new documented allergy of Zosyn. They called the doctor to clarify and he indicated to go ahead and give the IV Zosyn and monitor the resident for itching or an allergic reaction. The Zosyn should have been administered as ordered by the doctor.			
Residents Affected - Few	3. The record for Resident R was reviewed on 4/14/22 at 11:00 a.m. The resident was admitted to the facility on [DATE] at 2:05 p.m. Diagnoses included, but were not limited to, fusion of cervical spine, neuropathy, low back pain, cardiac murmur, and spinal stenosis. Nurses' Notes, dated 4/13/22 at 3:04 p.m., indicated the resident arrived to the facility per EMS. The resident was alert and oriented times 4 and able to make his needs known. Physician's Orders, dated 4/13/22, indicated Heparin (a blood thinner) 5000 units/milliliters (ml) 0.5 ml (5000 units) three times a day, scheduled times were 6:00 a.m., 12:00 p.m., and 6:00 p.m. every 8 hours times 30 days. The fax sent to pharmacy from nursing staff indicated, heparin (porcine) solution; 5,000 unit/ml Directions: amount 0.5 mls (5,000 units); injection; three times a day special instructions: Inject (5,000 units) into skin every 8 hrs x 30 days. The discharge instructions from the hospital, dated 4/13/22, indicated the Heparin was last administered on 4/13/22 at 5:37 a.m.			
	sheets, as he was admitted yesterd room, so they moved him to a differ worked a double shift that day, eas nurse with the admission and put the three times a day and not every 8 hours directive and did not back today and was working on the	14/22 at 11:00 a.m., indicated she just day afternoon, and before the ambuland rent room. He was only in that room for the unit in the morning and west unit for the Physician's Orders into the computer nours, so the computer came up with the double check the order or call the doct the east unit where the resident resided. The print new medication sheets. She had the contract of t	ce left, the family wanted a private r maybe 30 minutes. LPN 2 had he evening shift. She helped the r. The LPN indicated she typed in lose times. She had overlooked the for and clarify the order. She came There were no medication sheets	
	The medication cart was observed at 11:20 a.m., and the resident's oral medications were located in the cart, however, the Heparin medication was not in the cart. The LPN was unsure if the heparin medication was available in the EDK (Emergency Drug Kit).			
· · · · · · · · · · · · · · · · · · ·		nt Consultant on 4/14/22 at 12:30 p.m., indicated the Heparin order was however, the wrong dose was documented/transcribed, therefore, the tion because they needed a clarification.
