(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0582	Give residents notice of Medicaid/N	Medicare coverage and potential liability	y for services not covered.	
Level of Harm - Potential for minimal harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 39731	
Residents Affected - Some	Based on record review and staff interviews, the facility failed to provide an acknowledged Centers for Medicare and Medicaid Services (CMS) Skilled Nursing Facility Advanced Beneficiary Notice (SNF ABN) (form 10055) for 2 of 3 residents reviewed for beneficiary notification protection review (Resident #3 and Resident #16).			
	The findings included:			
	1. Resident #3 was admitted to the	facility on [DATE] with diagnoses inclu	ding hypertension.	
	He was admitted to Medicare Part A skilled services on 7/14/21.			
	Resident #3's significant change Minimum Data Set assessment dated [DATE] revealed she was cognitively intact.			
	Resident #3's Medicare Part A skill	ed services ended on 8/4/21. He remai	ined in the facility.	
	The SNF ABN reviewed had Resident #43's name, the date services were to end, and a statement that resident was made aware of non-coverage on 8/2/21. There were no options checked for the decision made about continuing Medicare Part A services on the notice.			
	An interview was conducted with Social Worker #1 on 10/19/21 at 1:13 PM. She stated there should be an option checked for the decision made about continuing Medicare Part A services. The Social Worker stated she reviewed options with the resident but failed to ensure an option for continuing services was checked by Resident #3. She stated that there should have been documentation on the form about the discussion.			
	An interview was conducted with R signing the SNF-ABN	esident #3 on 10/20/21 at 1:52 PM who	o stated he did not remember

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0745	Provide medically-related social se	rvices to help each resident achieve the	e highest possible quality of life.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 39731	
Residents Affected - Few	Based on record review and staff interviews the facility failed to ensure a resident was referred to an outpatient nephrologist as indicated in the hospital discharge instructions for 1 of 1 sampled resident reviewed for medically related social services (Resident # 7).			
	The findings included:			
	Resident #7 was admitted to the fa	cility on [DATE] with diagnoses that inc	sluded chronic kidney disease.	
	Resident #7's hospital discharge summary dated 7/30/21 read in part, Patient will need referral/follow up with an outpatient nephrology provider to continue to help manage his CKD3 (chronic kidney disease) and chronic metabolic acidosis from ileal conduit (a system of urinary drainage created after bladder removal) requiring supplemental sodium bicarbonate. This refers to the secretion of sodium and bicarbonate due urine having contact with the bowel wall.			
		n Data Set (MDS) assessment, dated 8 ired extensive assistance with most ac sonal hygiene.		
	A review of Resident #7's medical record revealed no appointments scheduled with nephrology since his admission.			
	During an interview with the facility's Assistant Director of Nursing on 10/20/21 at 8:55 AM, she stated that she was unable to locate documentation of an appointment for Resident #7 during the period from July 2021 to present with nephrology. She indicated the nurse who admitted Resident #7 should have made this appointment.			
	The nurse who admitted Resident	#7 was unavailable for interview.		
	An interview was conducted with the Director of Nursing (DON) on 10/20/21 at 9:03 AM. She stated Resid #7 should have had an appointment scheduled with a nephrologist. The DON stated it was her expectation when a nurse admits a resident all referral appointments are made.			
	An interview was conducted on 10/20/21 at 11:15 AM with Resident #7's primary care physician. He indicated Resident #7 should have followed up with an outpatient nephrologist as stated in the hospital discharge summary. The physician stated Resident #7 had suffered no harm as a result of the lack of follow-up.			
	An interview was conducted with the Administrator on 10/20/21 at 3:38 PM who indicated Resident #7 shoul have been referred to a nephrologist as stated in the hospital discharge summary.

F 0835	Administer the facility in a manner that enables it to use its resources effectively and efficiently.			
Level of Harm - Immediate	20711			
jeopardy to resident health or safety	Based on observation, staff interview	ew and record review the facility failed t	o implement effective systems for	
Residents Affected - Some		Iff were educated and competent to cle des observed to perform fingerstick blo nd Med Aide #2).		
	Immediate Jeopardy began on 10/19/21 when administration did not ensure effective protocols or systems were in place to ensure medication aides were educated and competent to clean and disinfect a shared glucometer. This was evident for 2 of 2 medication aides observed to perform fingerstick blood glucose tests (Med Aide #1 and Med Aide #2). There was no protocol in place to ensure this training and competency and there was not a protocol in place to orient new medication aides. The facility was not able to show that a skills checklist was completed for the 2 medication aides. Immediate Jeopardy was removed on 10/22/21 when the facility provided and implemented an acceptable credible allegation of Immediate Jeopardy removal. The facility will remain out of compliance at a lower scope and severity level of E (No actual harm with a potential for minimal harm that is not Immediate Jeopardy) to ensure the monitoring of systems put into place and to complete facility employee and agency staff in-service orientation and training.			
	The findings included:			
	This tag is cross referenced to:			
	F880 - Based on observations, staff interviews and record review the facility failed to use an approved procedure to clean and disinfect a shared glucometer used for 5 of 5 residents (Resident #15, #2, #50, #38 and #1). Shared glucometers can be contaminated with blood and must be cleaned and disinfected after each use with an approved product and procedure. Failure to use an Environmental Protection Agency (EPA) approved disinfectant in accordance with the manufacturer of the glucometer increased the likelihood of the spread of blood borne infections between residents. Failure to disinfect a shared glucometer was observed when 2 of 2 medication aides were observed to perform a fingerstick blood glucose test on residents and did not disinfect the glucometer per manufacturer 's specifications (Med Aide #1 and Med Aide #2).  On 10/19/21 at 12:10 PM an interview was conducted with the Assistant Director of Nursing (ADON) who was also the Infection Control Nurse in the facility. The ADON stated she was also was responsible for staft training in the facility. The ADON stated that Med Aide #1 had recently received her certification and had justanted working as a med aide. The ADON further stated that Med Aide #1 received orientation on the medication (med) cart for 2-3 days with a nurse until the Med Aide was comfortable. The ADON stated that Med Aide #2 was from an agency and was expected to be able to go straight to the med cart and do the jot The ADON further stated that agency staff received some general orientation to the facility but did not receive training related to medications or the glucometer. F 0880  Level of Harm - Immediate jeopardy to resident health or safety	The blood glucose monitor cleaning skills checklist provided by the facility read as follows: 6. Wipe the monitor thoroughly, ensuring it is visibly wet and place on a clean surface. 7. Follow the wipe manufacturer 's instructions for the length of time the monitor must remain wet. Wrap the monitor with an additional wipe, if necessary, to ensure it remains wet for the required time. 8. Once the appropriate length of time has elapsed, allow the monitor to air dry on a clean surface.		
Residents Affected - Some	1. On 10/19/21 at 11:40 AM, Med Aide #1 was observed to check a fingerstick blood glucose for Resident #15. The Med Aide was observed to return to the medication cart and used a germicidal bleach wipe and wiped the glucometer front and back for approximately three seconds, disposed of the wipe, dried the glucometer with a tissue, wrapped the glucometer in the tissue and placed it back on the medication cart. During the observation, Med Aide #1 stated that the residents did not have their own glucometer and the one she used, was shared between other residents. The Med Aide stated that at this time she had no further blood glucose checks.		
	A second interview was conducted with Med Aide #1 on 10/19/21 at 2:15 PM. The Med Aide stated she took a med aide class at a local college and they were taught to wipe off the glucometer before and after each resident. The Med Aide further stated the glucometer was supposed to be wet for 15-20 seconds and sit and dry for 3-5 minutes.		
	On 10/19/21 at 4:00 PM, Med Aide being observed to do the fingerstic	#1 stated she knew how to clean the gk blood glucose.	glucometer but was nervous when
	A review of each resident 's electron	onic medical record revealed the follow	ing:
	In addition to the blood glucose level observed to be checked by Med Aide #1 on 10/19/21 at 11:40 AM, Resident #15 also had her blood glucose results documented by Med Aide #1 on 10/14/21 at 12 Noon and 4:00 PM.		
		ood glucose documented as checked by ose was also documented for Resident	
	In addition, Resident #50 had a b AM and on 10/14/21 at 12 Noon ar	lood glucose documented as checked lad 4:00 PM.	by Med Aide #1 on 10/19/21 at 8:00
	On 10/19/21 at 12:10 PM the Assistant Director of Nursing (ADON) who was also the Infection Control Nurs stated in an interview that Med Aide #1 was oriented on the medication cart for 2-3 days by one of the nurse until the Med Aide felt comfortable. The ADON stated the staff was to disinfect the glucometer before and after use because the glucometer was shared between residents. The ADON further stated the staff were to use the wipes to clean the glucometer and wait for 5 minutes to dry.		
	On 10/19/21 at 2:00 PM the Admin as being 9/23/21.	istrator provided the date that Med Aide	e #1 started on the medication cart

F 0880  Level of Harm - Immediate jeopardy to resident health or safety  Residents Affected - Some	s plan to correct this deficiency, please contact the nursing home or the state survey agency.  SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)  The facility failed to use the appropriate procedure to clean and disinfect shared glucometers used for 5 residents, #15, #2, #50, #38 and #1, required to have a blood sugar glucose. The facility failed to educa Med Aide #1 and Med Aide #2 on how to clean and disinfect a shared glucometer according to manufact 's instructions when used for multiple residents.  Med Aide #1 and #2 were observed not disinfecting the glucometer in between residents on 10/19/21.  Each resident that has a blood sugar glucose has been given an, individually assigned glucometer that been placed at their bedside as of 10/19/21 by the Director of Nursing (DON). The previously shared glucometers were removed from the medication carts. Extra glucometers are available for staff that do t fingerstick blood sugar (FSBS) to ensure new admissions or residents with orders for FSBS 's have the own glucometer.  Current medication aides and licensed nurses will receive training on the importance of cleaning and disinfecting the glucometer per manufacture 's guidelines using the Blood Glucose Monitoring/Cleaning checklist. This checklist indicates the facility will use the (name of) germicidal bleach wipes and the contime required is 3 minutes. Education ensures that staff understand, even though the residents have the own glucometers, they still have to clean and disinfect them after every use according to the manufacture instructions.  The education includes the purpose for following cleaning check list process for glucometers due to the likelihood of cross contamination and the spread of blood borne pathogens among residents. This educ was started on 10/19/21 by the Director of Nursing and the Assistant Director of Nursing. Effective 10/2 no medication aide or licensed unses will do a fingerstick blood sugar check without the validati		shared glucometers used for 5 use. The facility failed to educate cometer according to manufacturer ween residents on 10/19/21.  ally assigned glucometer that has DN). The previously shared are available for staff that do the h orders for FSBS 's have their  importance of cleaning and d Glucose Monitoring/Cleaning idal bleach wipes and the contact though the residents have their se according to the manufacturer 's ess for glucometers due to the is among residents. This education ctor of Nursing. Effective 10/20/21 ck without the validation of the f. The Director of Nursing will be glucose monitoring checklist.  ices on 10/20/21 of the Immediate cedures required per manufacturer 'e health Department Nurse meters. She was informed that this of her supervisor and would give an versation with the Medical Director dication aides regarding the ent Nurse was informed by the health Department Nurse.  21/21 of the potential for exposure meters.  ed for any testing for the affected
