Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41581	
Residents Affected - Few	Based on a review of the facility's abuse prohibition policy and procedures, information submitted by the facility and select facility investigative reports and staff interviews it was determined that the facility failed to timely report alleged sexual abuse of one resident (Resident 2) out of 17 residents sampled.			
	Findings include:			
	Review of facility's policy entitled Abuse Policy last reviewed by the facility January 2022, indicated all reports of resident abuse shall be promptly reported to local, state, and federal agencies and thoroughly investigated by the administrator or designee. Reporting to the state agency (Pennsylvania Department of Health) is required within two hours if the alleged violation involves abuse or 24 hours if the alleged violation does not involve abuse. In response to an allegation of abuse, the facility will analyze and implement necessary changes to prevent future occurrences of abuse.

F 0622  Level of Harm - Minimal harm or	However, the facility was unable to demonstrate that Resident 57's, Resident 59's and Resident 16 that the necessary information, including the resident's care plan goals, was included with the transfer information communicated to the receiving health care facilities.		
potential for actual harm  Residents Affected - Some		aled that Resident 120 was admitted to mentia with behavioral disturbance and	
	The most recent quarterly Minimum Data Set assessment (a federally mandated standardized assessment completed periodically to plan resident care) dated, August 7, 2021, indicated that the resident had a BIMS (brief interview mental screening) score of 6 indicating severe cognitive impairment.		
	A review of the resident's clinical record and information submitted by the facility revealed that following the resident's admission the resident had been involved involved in incidents with with other residents, including altercations during which the resident smacked another resident with a newspaper and also episodes of intrusive wandering, into other resident rooms and rummaging through other residents' personal belongings.		
	Progress notes dated September 21, 2021, revealed that the facility contacted the resident's daughter informing her of the resident's increased behaviors. It was noted that facility explained to the resident's daughter that due to the facility being unable to appropriately meet her needs they recommended that the resident be transferred to a facility with a locked unit. The resident's daughter agreed to the transfer. The facility informed the resident's daughter that a sister facility had an available bed for the resident. The resident was transferred out of the facility on this same date.		
	A review of the resident's discharge summary written by the CRNP (certified nurse practitioner) on September 30, 2021, revealed that the reason for discharge was related to advancing dementia. The summary of the resident's care revealed that the resident required 24 hour supervision, medication management for bipolar disorder, insomnia and heart failure. The resident required frequent redirection related to cognitive deficits during her course of stay at the facility.		
	The facility failed to demonstrate that any of the circumstances permissible for a facility to initiate a transfer or discharge had occurred. The resident's clinical record did not show the basis for the resident's transfer or discharge. This documentation must be made before, or as close as possible to the actual time of transfer or discharge.  The resident's physician had not documented information about the basis for the transfer or discharge including te specific resident needs the facility could not meet; the facility efforts to meet those needs; and the specific services the receiving facility will provide to meet the needs of the resident which cannot be met at the current facility		
	Interview with the social worker on January 7, 2022 at 2:30 PM indicated that the resident was transferred to another facility because the facility was unable to properly supervise the resident.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0689  Level of Harm - Actual harm  Residents Affected - Few	Resident 1 was transferred on November 24, 2021, to a room on the second floor at that time but returned to her original room on the third floor on that same day after a male resident was paying inordinate attention to her and sitting very close, making Resident 1 very uncomfortable according to the resident's clinical record documentation.			
, , , , , , , , , , , , , , , , , , , ,	A review of nurses notes dated January 10, 2022 at 1:24 p.m. revealed Resident 1 continuously pacing back and forth, going in and out of other resident rooms, taking drinks, straws and tissues from the medication cart (stored next to the nurses desk in the hallway) and other resident rooms despite redirection, food/fluid, toileting and diversional activities. Nursing noted will continue to monitor and redirect.			
	A review of a social services note dated January 11, 2022, at 2:40 p.m. revealed worker visited with {Resident 1}, approaching her in a calm, unhurried manner. She continuously walked back and forth on the unit throughout the interaction. The social worker reviewed the importance of respecting other peers belongings and not going into resident rooms that were not hers. Her comprehension was questionable as {Resident 1} remains verbally unresponsive to staff. She appeared to be calm and content at this time as evidenced by facial expression.			
	A review of a nurses noted dated January 21, 2022, at 9:49 a.m. revealed, this nurse witnessed {Resident 1} walking very fast up and down the hallways. I approached resident and encouraged her to slow down and take her time walking. {Resident 1} then sat down in a chair in the resident dining room for a moment. She then stood up and began walking very fast again. She immediately fell, hitting the left side of her head on the dining room floor. She was alert and basic first aide applied, the physician was contacted and {Resident 1} was sent to the hospital.			
	A review facility investigation report dated January 21, 2022 at 9:31 a.m. revealed, the nurse witnessed Resident 1 walking very fast up and down the hallways. The nurse encouraged her to slow down and take her time walking. The resident sat down in a chair in the dining room for a moment. Resident 1 then stood up and began walking very fast and immediately fell hitting the left side of her face on the dining room floor. The physician was called and the resident was transferred to the hospital for evaluation and treatment.			
		ng factors for this incident were that the awareness. Upon return to the facility, and bed alarm.		
	Additional notes included in the investigation report dated January 21, 2022 (no time indicated) revealed Call placed to local hospital for an update on {Resident 1}. Spoke to the resident's emergency room nurse. {Resident 1} was currently having stitches placed to the left side of her forehead. {Resident 1} will be transferred to another hospital to be treated for brain bleed.

She was transferred to the receiving hospital for a higher level of care to be evaluated by neurosurgical service. {Resident 1} was admitted to the intensive care unit (ICU) for this head bleed for closer monitoring. She will be seen by neurosurgery as well. The physician assessment included, traumatic brain injury, admit the resident to the ICU, scalp laceration, continue with wound care.			
	Resident 1 was readmitted to the fa	acility on [DATE] at 3:20 p.m.		
	A review of a care plan for at risk for falls, initiated August 6, 2021 revealed new interventions, dated January 28, 2022, after the resident's fall with head injury, were to add a chair and bed alarm.			
	A review of the resident's care plan for wandering behavior, initiated August 12, 2021, revealed the care plan was last reviewed September 8, 2021, but had not been reviewed or updated with any additional interventions since the August 2021 date. There was no documented evidence that the resident's need for staff supervision was identified as a planned intervention to promote this resident's safety and incorporated into the resident's plan of care and implemented by staff.			
	Continued review of the clinical record from the time of the resident's return to the facility on [DATE], through the time of the survey April 6, 2022, the nursing continued to document the resident's unsafe and wandering behaviors.			
	A review of nurses notes dated April 2, 2022 at 7:48 a.m. revealed an RN assessment was completed. {Resident 1} remains alert. No change in level of consciousness (LOC). Makes eye contact. Neurological signs within normal limits. Hematoma ( a collection of blood under the skin) left forehead. Scant amount of bleeding from the left forehead. Laceration measuring 0.5 cm x 0.1 cm. Ice applied . Resident remains nonverbal, at baseline with poor safety awareness.			
	A review of a nurses note dated Apambulance to the local hospital.	oril 2, 2022 at 8:37 a.m. revealed that th	ne resident was transferred via	
	There was no documentation in Refall with a second head injury.	sident 1's clinical record of the circums	tances surrounding the resident's	
	However, review of a facility investigation report dated April 2, 2022, at 8:09 a.m. revealed that Resident 1 fell while in the resident dining area at 7:45 a.m. and found with her arm resting behind and beneath her. Active bleeding to the left side of her forehead was present. Non-skid socks were on both feet and the resident was continent at the time of the fall. Chair alarm in use according to the report.			
	There were no staff witness statements included with the investigation report available at the time of the survey of the April 6, 2022, which identified the location of staff at the time of the resident's fall, which had occurred during the breakfast meal.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0689  Level of Harm - Actual harm  Residents Affected - Few	A review of hospital documentation dated April 2, 2022, at 11:30 a.m. revealed that {Resident 1} presents to the hospital after fall from a chair with a head strike. The patient was sitting at breakfast and fell forward out of her chair. She did strike her head. LOC (level of consciousness) is unknown. Patient is non verbal and non- interactive at her baseline.			
Nesidents Anected - Lew		April 2, 2022, revealed, acute, small s thickness. Neurosurgery was consulted		
	intermediate care or step-down uni	CU, (A PCU is a Progressive Care Uni ts, provide an intermediate level of pati nedical-surgical units) for observation a	ent care that bridges the gap	
	A review of a nurses note dated April 2, 2022 2:34 p.m. revealed call placed to the hospital for an update. {Resident 1} is admitted to the hospital with intercranial hemorrhage (bleeding inside the skull {cranium})at this time.			
	Resident 1 was readmitted to the facility on [DATE], at 8:28 p.m. A body audit was completed by nursing noting a 1.5 cm, healing laceration with steri-strips intact, and 1.5 cm x 1.5 cm bruise, left forehead above healed laceration.			
	Observations made during the survey of April 6, 2022 at 10:50 a.m revealed that Resident 1 was seated in a geri chair in the third floor resident dining room. The surveyor observed Resident 1 stand up from her chair and begin to pace around the perimeter of the room. She continued to wander, pace the hallways, unmonitored by staff, often increasing her speed. The chair alarm was in place, but not sounding to alert staff of the resident's self-rising and unassisted ambulation.			
	The facility failed to demonstrate that the resident was consistently provided with necessary staff supervision due to the resident's known unsafe behaviors to prevent repeated falls and serious head injuries. The resident fell and sustained a serious head injury on January 21, 2022, which required hospitalization and again incurred a second fall with head injury requiring hospitalization on [DATE].			
	During an interview April 6, 2022 at approximately 2 p.m., the Nursing Home Administrator (NHA) confirmed that the facility was unable to provide evidence that the facility had consistently provided sufficient staff supervision of this resident at risk for falls and injuries and unsafe behaviors that was known to facility staff and had implemented effective safety interventions to prevent falls and multiple head injuries.

F 0697	Provide safe, appropriate pain mar	agement for a resident who requires s	uch services.
Level of Harm - Minimal harm or potential for actual harm	13456		
Residents Affected - Few	Based on clinical record review and staff interview, it was determined the facility failed to attempt non-pharmacological interventions to alleviate pain prior to the administration of an opioid pain medication prescribed on an as needed basis for one resident (Resident 59) of 18 residents reviewed.		
	Findings include:		
	A review of Resident 59's clinical record revealed a current physician order, initially dated December 8, 202 for Oxycodone HCL 10 mg (opioid pain medication) one tablet by mouth every 12 hours for severe pain and Oxycodone HCL 5 mg one tablet by mouth every six hours as needed for breakthrough pain for a 4-10 pain level.		
	A review of the resident's December 2021 Medication Administration Record (MAR) revealed that staff administered the opioid pain medication thirteen times during the month of December 2021. Of the thirteen doses given, all were administered without evidence that non-pharmacological interventions attempted to reduce pain prior to administering the pain medication.		
	A review of the resident's January 2022 MAR revealed that staff administered the pain medication six times during the month of January 2022, as of the time of the survey ending January 7, 2022. Of the six doses given, all were administered without non-pharmacological interventions attempted to reduce pain prior to giving the pain medication.		
	Interview with the Nursing Home Corporate Registered Nurse on January 7, 2022 at approximately 1:00 PM confirmed there was no evidence that non-pharmacological interventions were consistently attempted, and proved ineffective, prior to administration of prn opioid pain medication.

F 0698	Provide safe, appropriate dialysis of	are/services for a resident who require	s such services.
Level of Harm - Minimal harm or potential for actual harm	13456		
Residents Affected - Few	Based on clinical record and select policy review and resident and staff interview it was determined the facility failed to consistently monitor a resident's prescribed fluid intake related to kidney disease and dialysis treatment for one resident receiving dialysis out of two residents receiving dialysis sampled (Resident 59).		
	Findings include:		
		Encouraging and Restricting Fluids respecific instructions/MD orders concern	
	Review of Resident 59's clinical record revealed admission to the facility December 28, 2021, with diagnoses of chronic kidney disease with hemodialysis [process of removing waste products and excess fluid from the body when the kidneys are not able to adequately filter the blood].		
	A physician order was noted Decer	mber 28, 2021, for a 960 milliliter (ml) fl	uid restriction daily.
	Review of Resident 59's current care plan indicated that the distribution of fluids was noted as: 120cc with 7 AM to 3 PM med pass, 240 cc with breakfast, 240 cc with lunch, 120 cc with 3 PM to 11 PM med pass, 180 cc with dinner, and 60 cc for 11 PM to 7 AM.		
	Resident 15's September 2021 MAR revealed that the resident exceeded the 960 ml physician prescribed fluid restriction on 25 days out of 30 days during the month. On 5 days, Resident 15's fluid intake was not monitored by staff.		
	A review of the resident's December 2021 and January 2022 MAR (medication administration record) revealed that the facility staff only sporadically documented the amount of fluids the resident consumed with the resident's medication administration. The facility was unable to provide documentation of the resident's fluid intake during his meals and daily activities. The facility was unable to demonstrate that staff accurately monitored the resident's daily fluid intake or maintenance of the resident's fluid restriction.

Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS F	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 26142	
Residents Affected - Some	Based on observations, a review of clinical records and select facility investigation reports and staff interviews, it was determined that the facility failed to provide necessary behavioral health care and services to maintain the highest practicable mental and psychosocial well-being for one of 8 sampled residents (Resident 1) with unsafe behavioral symptoms.			
	Findings include:			
	A review of the clinical record of Resident 1 revealed admission to the facility on [DATE], with diagnoses th included cerebral infarction(stroke), toxic encephalopathy, (occurs when toxic chemicals, or a chemical imbalance caused by an infection, affects brain function), anxiety, lack of coordination, was non-verbal and had a history of falls.			
	A review of a quarterly Minimum Data Set assessment (MDS - a federally mandated standardized assessment process conducted periodically to plan resident care) dated November 10, 2021, revealed that the resident was severely cognitively impaired, required staff assistance with activities of daily living, including requiring the assistance of one staff for ambulation in hallways, was at risk for falls and has had two falls since admission to the facility.			
	A physician order dated April 6, 2022, was noted for a regular diet, puree texture and nectar thick consistency for liquids.			
		dated October 9, 2021, at 9:32 p.m. re the course of the past few days. Patien eals, rest periods.		
	A review of nurse's notes dated November 22, 2021, at 10 p.m. revealed, nurse aide came to charactering that Resident 1 had blood coming from her mouth. Upon assessment, at first, Resident we open her mouth and was noted to heave blood all over her mouth and down her gown. Nurse and aides were able to convince her to open her mouth and a lot of blood came pouring from her mouth were able to convince her to open her mouth again, because as we were rubbing her cheeks, we that there was a foreign body in her mouth. It took a couple of minutes, but when she did open he big red bingo chip fell out of her mouth and to the floor. We cleaned out her mouth to the best tha allow at that time. Nurse practioner called, new orders noted to call the dentist and also for nursin Resident on every 15 minute checks.			
	A review of nurses notes dated November 24, 2021 at 2:11 p.m. revealed that Resident 1's daughter wa contacted concerning a room change from the third floor (where several residents run a small store from resident lounge at the end of the hallway. Items for sale include packaged candy, chips and many other snack items. All of these items are displayed on several long tables, open for resident choice) to the sec floor due to Resident 1 touching items at the resident snack shop with redirection being unsuccessful.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0740  Level of Harm - Minimal harm or potential for actual harm	Continued observation revealed that Resident 1 then left the dining room and walked into the resident shower/bathroom. Employee 1 (LPN) attempted to redirect the resident with little success. Employee 1 then redirected Resident 1 back into the resident dining room where Resident 1 continued to ambulate around the perimeter of the room, increasing her speed during ambulation.		
Residents Affected - Some	Continued observation revealed that Resident 1 again left the dining room, ambulated to the unattended medication cart and removed a styrofoam, covered bowl of applesauce (used in medication administration to some residents) and carried it to the opposite end of the hallway, into the resident lounge/snack shop area. She placed the container of applesauce on a couch and ambulated over to the 2 tables of candy/snacks, that were being sold by Resident 2.		
	Continued observation revealed that Resident 2 made multiple trips to the open boxes of candy/snacks and helped herself to several candy bars. She handled these candy bars with her hands then placed them on the couch with the container of applesauce. This observation lasted approximately 10 minutes. After which a facility staff member removed the candy from Resident 1 and returned the open boxes on the table. The resident was escorted back to the residents' dining room and seated in her gerichair.		
	An additional observation on April 6, 2022, at approximately 11:30 a.m., revealed Resident 1 was again ambulating from the residents' dining room down the short hallway. She was increasing her speed as she walked down the hall. She then walked down the long hallway to the resident lounge area/snack shop area. Resident 1, again picked up multiple candy bars, handling them as she walked, eventually placing them on the couch.		
	The facility failed to demonstrate that the resident was provided with necessary behavioral health care services in response to her unsafe behaviors and her placing objects into her mouth causing bleeding to her oral cavity.		
	develop and implement a person-c needs of this resident. The facility f	ecessary services for the behavioral he entered care plan that included and su failed to review and revise the resident is safety and psychosocial well-being.	pported the behavioral health care
	During an interview April 6, 2022 at approximately 2 p.m., the Nursing Home Administrator (NHA) confirmed that the facility failed to provide this resident with necessary behavioral health care and services and plan individualized approaches to care, including direct care and activities, to meet the resident's behavioral health needs.

F 0881	Implement a program that monitors	s antibiotic use.	
Level of Harm - Minimal harm or potential for actual harm	13456		
Residents Affected - Many	Based on a review of the facility's antibiotic use and staff interview, it was determined the facility failed to establish an antibiotic stewardship program including protocols for antibiotic use and monitoring to optimize the use of antibiotics in the facility.		
	Findings include:		
	During interview with the facility's N	Jursing Home Administrator (NHA) on C	January 7, 2022,
	the NHA was unable to provide evidence of the facility's current functioning antibiotic stewardship program that promotes the appropriate use of antibiotics and includes a system of monitoring to improve resident outcomes and reduce antibiotic resistance. The NHA stated that the Director of Nursing (DON) was the employee who maintained that information, but since the DON had resigned as of December 22, 2021, the NHA was unable to provide any information from the past year regarding the facility's antibiotic stewardship program.		
	There was no documented evidence antibiotic use.	ee that the facility had implemented pro	tocols and a system to monitor
	There was no evidence that any staff, i.e., Infection Preventionist had reviewed antibiotic use, monitor prescriptions and physician orders to ensure they were in accordance with any facility antibiotic use and practices. There was no evidence that antibiotic use was tracked for patterns of use and adherence to determine if new stewardship interventions are effective		
	An attempt to review of the facility's Antibiotic Stewardship surveillance, tracking and trending for the past year was conducted during the survey ending January 7, 2022, but there was no data available for review at the time of the survey.		
	During an interview on January 7 2022. the NHA, confirmed that the facility was unable to provide evidence of surveillance, tracking and trending of antibiotic use in the facility at the time of the survey ending January 7, 2022.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)				
F 0882  Level of Harm - Minimal harm or	Designate a qualified infection preventionist to be responsible for the infection prevent and control program in the nursing home.				
potential for actual harm	13456				
Residents Affected - Many	Based on observations, staff interviews and a review of the facility's infection control program it was determined that the facility failed to have a designated Infection Preventionist responsible for the facility's infection prevention and control program.				
Findings include:					
	During an interview with the NHA (nursing home administrator) during the survey of January 7, 2022, the NHA stated that the facility's infection control surveillance program was the responsibility of the DON (director of nursing) who was also the Infection Preventionist. However, the DON was no longer employed by the facility and the December 2021 infection control tracking was nit available at the time of the survey ending January 7, 2021.  The NHA stated that at the time of the survey ending January 7, 2022, facility had no one designated as the infection Preventionist (IP) who was responsible for the facility's IPCP and due to the lack of an IP the facility was unable to demonstrate a functioning system for surveillance for routine, ongoing, and systematic collection, analysis, interpretation, and dissemination of surveillance data to identify infections (i.e., HAI and community-acquired), infection risks, communicable disease outbreaks, and to maintain or improve resident health status. The facility was unable to demonstrate how it tracks infections and addresses any areas needing corrective action. The facility was unable to to provide evidence of the development and implementation of an ongoing infection prevention and control program (IPCP) to prevent, recognize, and control the onset and spread of infection to the extent possible.  Refer F 727  28 Pa. Code 211.12 (c)(d)(4)(5) Nursing Services.

Residents Affected - Few  facility failed to offer and/or provide the influenza and/or pneumococcal immunizations, unless the immunization was medically contraindicated or the resident had already been immunized for one of nine residents reviewed (Resident 70).  Findings include:  Review of the facility's Influenza/Pneumococcal Immunization policy last reviewed, January 2021, indicate all residents will be offered pneumococcal vaccines to aid in preventing pneumonia/pneumococcal infection. Upon admission to the Living Center the resident and/or responsible party will be given education regardir the risks and benefits of receiving the Influenza and Pneumococcal immunization vaccines. Previous immunization history can be obtained from resident interview, responsible party interview, center admission paperwork, hospital discharge/transfer paperwork. Before receiving a pneumococcal vaccine, the resident legal representative shall receive information and education regarding the benefits and potential side effect of the pneumococcal vaccination. Provision of such education shall be documented in the resident's medic record. Additionally, if the resident is admitted to the facility after influenza season and has not already received the immunization, the vaccine will be offered, and verify that consent was given for the resident to receive the vaccine and that education of the risks and benefits were provided. This information will be documented in the resident's electronic health record Immunization portal.  Review of the Resident 70's clinical record revealed the resident was admitted on [DATE].  Review of the resident's immunization record indicated that there was no documented evidence that the resident was offered the influenza and pneumococcal vaccines, that the resident was provided with education on the risk and benefits of these vaccines, or that the influenza and/or pneumococcal vaccines were administered to the resident.  Interview with the Nursing Home Administrator on January 6, 2022, at approximately 1:3				NO. 0930-0391
