	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by f	IENCIES full regulatory or LSC identifying informati	on)
F 0609 Level of Harm - Minimal harm	Timely report suspected abuse, neglect, or theft and report the results of the investigation to proper authorities.		
or potential for actual harm	30934		
Residents Affected - Few	Based on clinical record review, facility documentation review, facility policy and procedure review, and stat interview it was determined the facility failed to report an allegation of abuse to the state agency for one of a residents reviewed. (Resident 133)		
	Findings Include:		
	receiving information concerning a	ure titled Abuse Prohibition, undated, report of suspected or alleged abuse, ng. Report allegations to the appropria istreatment.	mistreatment, or neglect, the CED
		notes revealed a nursing progress not or entered at 9:30 a.m. observed resid wedged under himself.	
		ted February 19, 2022, revealed Resid ht side of the bed prone position with r /alk himself to the bathroom.	
	Review of Fall Review Statement obtained from the staff at the time of the fall revealed the statement of Employee E3 stating Resident 133 was found on the floor face down with dried blood and feces all over his body this morning while doing rounds. My supervisor later came in to ask how long he has been on the floor, and he responded since 2 a.m. three times.		
	Review of further documentation provided by the facility revealed that the incident was fully investigated for neglect.		
	Review of the Electronic Event Report, dated February 19, 2022, submitted to State Agency revealed the event was reported as a transfer to the hospital not as an allegation of abuse. Review of the description of the event revealed no information regarding Resdient 133's allegation he was on the floor since 2 a.m. and covered in dried feces and blood.

Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41765	
Residents Affected - Few	Based on review of clinical records and facility documentation, as well as staff interviews, it was determined that the facility failed to address a suspected right femur (thigh bone) non-displaced fracture (the bone breaks but retains its proper alignment) timely as evidenced by a radiology report. This failure had resulted harm of unnecessary discomfort, pain, and hospitalization for one of 32 residents reviewed (Resident 101).			
	Findings include:			
	Review of Resident 101's diagnosis list revealed Cerebrovascular Accident (stroke), and Hemiplegia (paralysis of one side of the body).			
	Review of Resident 101's Quarterly Minimum Data Set (MDS- standardized assessment tool that measures health status in long-term care residents) dated October 22, 2021, revealed that the resident had moderate cognitive impairment. Further review of the same MDS assessment revealed the resident required supervision with transferring and ambulation on and off the unit.

F 0760	Ensure that residents are free from significant medication errors.				
Level of Harm - Minimal harm or potential for actual harm	41765				
Residents Affected - Few	Based on clinical records review, resident, and staff interviews, it was determined that the facility failed ensure residents were free from significant medication errors for two 32 residents reviewed (Residents and 358).				
	Findings include:				
	Review of Resident 68's diagnosis list revealed Heart Failure, Hypertension (elevated blood pressure), and End-Stage Renal Disease (ESRD).				
	Review of the physician's progress notes revealed Resident 68 is on Hemodialysis (treatment that filters waste and water from your blood) every Monday, Wednesday, and Friday for diagnosis of ESRD.				
	Review of Resident 68's Physician Order (POS) dated June 2, 2022, revealed an order of Clonidine HCL (medication used to treat high blood pressure) tablet 0.1 mg (milligram) give one tablet every eight hours for hypertension only if blood pressure is above 180.				
	Review of Resident 68's June 2022 Medication Administration Record (MAR) revealed that Clonidine medication was administered 15 times for blood pressure below 180.				
	Interview with the Director of Nursing on June 17, 2022, at 1:00 p.m., confirmed that resident 68 was administered Clonidine outside of the physician's ordered blood pressure parameters.				
	Review of Resident 68's POS dated June 2, 2022, revealed an order of Lokelma Packet (medication used to treat high levels of Potassium in the blood) give one packet by mouth once a day for Hyperkalemia (elevated potassium) only if Dialysis is missed.				
	Review of June 2022, MAR revealed the medication Lokelma was administered on June 3, June 6, and June 9, 2022.				
	Review of the clinical records review revealed no documentation of the resident missing dialysis between June 2 until June 17, 2022.				
	Interview with the DON on June 17, 2022, at 1:00 p.m., confirmed that Resident 68 did not miss dialysis on the above-mentioned dates.				
	Review of Resident 358's diagnosis list revealed Cancer of the prostate, ESRD, and dependence on Hemodialysis.				
	Clinical records revealed Resident 358's Hemodialysis is every Monday, Wednesday, and Friday.				
	Review of Resident 358's physician order sheet revealed an order on June 7, 2022, for Calcium Acetate Tablet (medication to treat excessive phosphate in the blood of a patient with end-stage kidney disease on dialysis) 667 mg given two tablets by mouth three times a day for high phosphates. Administration times were as follows: 9:00 a.m., 1:00 p.m., and 8:00 p.m.
