F 0656 Level of Harm - Minimal harm or potential for actual harm	On 08/30/21 at 08:19 AM, resident 28 was observed at breakfast attempting to hold a cup with her left hand. After three attempts at grasping the cup, resident 28 was able to grasp the cup in order to bring it to her mouth. At this time, resident 28's right hand was closed and kept close to her body.			
Residents Affected - Some	On 08/30/21 at 11:38 AM, there we resident 28's bedside.	ere no splints or assistive devices to pre	event contractures present at	
	On 09/01/21 at 12:00 PM, resident 28 was observed at lunch. After attempting to use a fork to eat the meal, resident 28 was unable to grasp the fork with her left hand, and resident 28 ended up putting the fork back down on the table. Using her left hand, resident 28 was then observed to grasp the meat patty from her plate and was able to bring it to her mouth.			
	A review of resident 28's medical record was completed on 09/01/21. The following documentation regarding contractures was present:			
	i. A Weekly Note from 5/13/21 stated, Resident . Uses w/c [wheelchair] for mobility, has contractures in both hands.			
	ii. A Weekly Note from 7/15/21 stat is partially contracted.	ed, Rt. [Right] hand fully closed d/t [due	e to] contractures and Lt. [left] hand	
	iii. A Weekly Note from 7/22/21 stated, Resident has hand contractures and right hand completely closed.			
	iv. A Weekly Note from 8/5/21 state contracture is completely closed.	ed, Resident has contractures to both h	ands and Right (sic) hand	
	v. A Weekly Note from 8/26/21 stated, Contractures to both hands and left hand [resident] is still able to use and right hand is completely closed (sic).			
	vi. Resident 28's MDS assessment history was reviewed regarding functional status and Functional Limitation in Range of Motion. MDS records from 12/28/20, 3/30/21, and 6/30/21 indicated, Upper Extremity (shoulder, elbow, wrist, hand). Impairment on one side. [Note: per nursing documentation resident with contractures to both hands].			
	vii. Occupational Therapy (OT) documentation from therapy services was present from 12/10/19 to 3/8/20. OT documentation indicated resident 28 was seen for Contracture; right hand.			
	viii. On 08/30/21 at 12:08 PM, resident 28's care plan was reviewed. Within resident 28's electronic care plan, no care plan related to contractures was noted.			
	On 08/30/21 at 11:30 AM, CNA 2 reported being unaware if resident 28 had any contractures, and CNA 2 reported staff are not doing anything to prevent or treat any contractures resident 28 is suffering from.

F 0656 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	On 09/01/21 at 9:20 AM, LPN 1 reported being aware of resident 28's contractures. LPN 1 stated, in the past, LPN 1 had tried to place a rolled cloth into resident 28's right hand, which is fully contracted, but he was unable to open the right hand. LPN 1 also stated there are no consistent interventions in place to help prevent further contracture to resident 28's left or right hand. LPN 1 stated, resident 28 can currently use her left hand for some activities like eating. On 09/01/21 at 9:33 AM, the DON stated at this time there are no interventions in place to prevent further			
	contracture to resident 28's left hand. On 09/01/21 at 11:59 AM, CNA 4 stated in the past CNA 4 had observed LPN 1 trying to place a t resident 28's right hand, but LPN 1 was not able to get the towel inside of resident 28's right hand, stated, at this time, the CNA staff are not doing anything to prevent further contractures to residen or right hand.			
	45470			
	4. Resident 24 was admitted to the facility on [DATE] and was readmitted on [DATE] with diagnoses that included COVID-19, schizophrenia, anxiety disorder, conversion disorder, chronic kidney disease, and cognitive communication deficit.			
	Resident 24's medical record was i	reviewed on 8/29/21.		
	Resident 24's care plan was reviewed. Review of the care plan indicated that it was not developed until 1/15/21, approximately 3 weeks after resident 24 was admitted. The care plan indicated that the facility was to monitor resident 24's weights every week.			
	Review of resident 24's graphed w	eight records revealed the following we	ights:	
	a. 1/3/21 - 157.1 lbs.			
	b. 2/7/21 - 155.8			
	c. 3/7/21 - 157.6			
	d. 4/4/21 - 150.8			
	e. 5/2/21 - 150.4			
	f. 6/6/21 - 148.2			
	g. 7/4/21 - 146.2			
	On 7/3/21, the RD documented that resident 24's weight was overall trending downward, although no acute significant loss. Resident weight upon initiation of TF (tube feeding) Jan (January) 2021 161.6 [lbs], currently 144 [lbs], [decrease] 10.9 [percent] [in] 7 months. RD to cont (continue) to watch [and] f/u (follow up)PRN (as needed). The RD recommended that resident 24's tube feeding rate be increased to 75 ml an hour for 24 hours.

F 0679 Level of Harm - Minimal harm or potential for actual harm	The resident council notes from the previous several months were reviewed and revealed the following: [Note: Resident council was conducted on 11/5/20, 4/22/21, 5/27/21, 6/25/21, and 7/23/21. An interview with the Administrator (ADM) on 8/31/21 at 1:12 PM, confirmed that no resident council meetings occurred between November 2020 and April 2021.]			
Residents Affected - Many	a. On 4/22/21, the notes indicated tweek.	that the activities occurring in the facilit	y were church services every other	
	b. On 5/27/21, the notes indicated that residents were requesting the facility hire a recreational therapist. The residents requested bingo, van rides, outdoor cookouts, movie nights, balloon game in the hall, and yahtzee			
	c. On 6/25/21, the notes indicated that the residents wanted to sing, play dominoes, and socialize more. The notes also indicated that church services were happening every other week.			
	d. On 7/23/21, the notes indicated that the residents were again requesting van rides, outside walks, and a book club. The notes also indicated that there was a music group coming on 8/10/21.			
	3. On 8/29/21 at 1:30 PM, an interview was conducted with residents 43 and 35, who resided in the same room. Resident 35 stated that there used to be more activities. Resident 35 stated that the facility used to employ an activities person but they don't anymore. Resident 35 stated that he would like it if there were more activities. Resident 43 stated that the only activity currently happening at the facility was bingo.			
	4. Resident 24 was admitted to the facility on [DATE] and was readmitted on [DATE] with diagnoses that included COVID-19, schizophrenia, anxiety disorder, conversion disorder, chronic kidney disease, and cognitive communication deficit.			
		was observed multiple times throughout the survey from 8/29/21 through 9/1/21. At no time was observed to be out of his bed in his room.		
	Resident 24's medical record was r	reviewed on 8/29/21.		
	On 12/31/20, the facility completed an annual Minimum Data Set (MDS) for resident 24. The MDS indicat that a care plan for activities should have been developed.			
	Review of resident 24's medical record indicated that neither an assessment of resident 24's activity nor an activities care plan had been developed. Review of resident 24's physician orders revealed that the resident was receiving a tube feeding that running at 85 ml an hour for 24 hours a day. The physician orders also revealed that the resident had on a 24 hour continuous tube feeding since his readmission to the facility on [DATE].			
	asked if she had considered chang allowing the resident to leave his ro	/21 at 8:42 AM, an interview was conducted with the facility Registered Dietitian (RD). The RD was if she had considered changing the resident's tube feeding, so that it was not running 24 hours a day g the resident to leave his room and potentially attend activities. The RD stated that she had not ered that option, and that some residents preferred to stay in their room.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by	CIENCIES full regulatory or LSC identifying informati	on)	
F 0684 Level of Harm - Minimal harm or potential for actual harm	On 8/31/21 at 10:39 AM, RN 3 stated resident 44's facial rash, is off and on. When asked what treatment the nurses had been providing for resident 44's facial rash RN 3 reported, I do not know, and stated, I guess I should give her something. RN 3 stated when resident 44 was provided with a treatment or lotion for the facial rash it would be documented on the Medication Administration Record (MAR).			
Residents Affected - Few	On 9/1/21 at 8:11 AM, Licensed Practical Nurse (LPN) 1 reported the triamcinolone medication lotion would be the best choice to apply to resident 44's facial rash. LPN 1 reported when resident 44 was provided with the triamcinolone lotion it cleared up the facial rash. LPN 1 reported, if a nurse was to provide resident 44 with the triamcinolone lotion the nurse would document this within the MAR.			
	On 9/1/21 at 10:21 AM, the Director of Nursing (DON) reported resident 44 did get the facial rash, every once in a while. The DON reported resident 44 will have triamcinolone lotion applied to the facial rash. The DON reported the hydrocortisone cream could be used in addition to the triamcinolone lotion. The DON reported the facial rash had begun, .within the last couple days. About last Monday, which would have be around 8/23/21. The DON reported if a nurse did apply lotion to resident 44's facial rash it would be code within the resident's MAR. When the DON was asked about whether hydrocortisone or triamcinolone lotic should be used she reported, the triamcinolone works best and reported, the nurses need to be a little meducated about what to provide.			
	On 9/9/21, a review of resident 44's medical record was completed. The following documentation regarding resident 44's facial rash was present:			
	a. Skin check sheets:			
	i. Skin check sheet from 8/2/21 wit	th no skin issues noted.		
	ii. Skin check sheet from 8/6/21 sta	ated, Redness on face and right arm.		
	iii. Skin check sheet from 8/11/21	stated, Sore redness under breasts.		
	iv. Skin check sheet from 8/25/21	stated, Redness under stomach and br	east.	
	v. Skin check sheet from 8/30/21 s	stated, Red under breast.		
	b. A Weekly Note from 8/7/21 stated, Also has facial rash/redness and dermatitis cream is us needed).			
	c. A Weekly Note from 8/21/21 sta	ited, Redness rash on face and Triamc	ilone (sic) cream applied PRN.	
		ion with RN 3 about resident 44's facial tration Note Note Text: Hydrocortisone rash.

F 0684 Level of Harm - Minimal harm or potential for actual harm	e. On 08/31/21 at 10:53 AM, resident 44's MAR was reviewed for August 2021. An order was noted for, Triamcinolone Acetonide Cream 0.1 %. Apply to rash on face topically every 12 hours as needed for facial rash Apply BID (twice daily) prn. No documentation was present that resident 44 was provided with the Triamcinolone Acetonide Cream in August 2021.			
Residents Affected - Few	22992			
	Resident 99 was admitted to the facility on [DATE] with diagnoses that included localized swelling, mass and lump, lower limb, bilateral; paranoid schizophrenia; and lymphedema.			
	•	was observed. Resident 99 had large throughout the day on 8/30/21, 8/31/	· ·	
	Resident 99's medical record was reviewed on 8/29/21.			
	Resident 99's discharge orders from the hospital dated 8/5/21 revealed that resident 99 was to have leg wraps placed for management of his lymphedema.			
	Resident 99's care plan dated 8/17/21 documented that resident 99 had edema in both lower extremities due to lymphedema. The interventions included to apply compression as ordered and encourage resident to elevate legs while in room.			
	Resident 99's initial nursing evaluation dated 8/6/21 revealed that resident 99 had edema to his bilateral lower extremities.			
	Resident 99's Preadmission Screening and Resident Review (PASRR) dated 8/5/21. The PASRR evaluator indicated that on 6/10/21, resident 99's doctor reported significant swelling in [resident 99's] lower extremities. The evaluator also documented that resident 99 was experiencing a lot of leg pain and fatigue with ambulation, and that the resident could not apply compression stockings independently.			
	Progress notes for resident 99 reve	ealed the following:		
	a. On 8/6/21, staff indicated that re to the facility from the hospital.	sident 99 has lymphydema (sic) wraps	to his legs bilaterally upon arrival	
	b. On 8/6/21, staff indicated that re right leg.	sident 99 had 4 plus edema to bilatera	l legs, his left leg is larger than his	
	c. On 8/8/21, staff indicated that te	d hose were applied to resident 99's le	gs for lymphedema.	
	No progress notes were located in	resident 99's chart after 8/9/21.		
	Review of resident 99's physician of wraps to be applied.	orders revealed that resident 99 did not	have an order for compression

F 0692	Provide enough food/fluids to main	tain a resident's health.	
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 45470
Residents Affected - Few	Based on interview and record review, the facility did not ensure that 1 of 30 sample residents maintained acceptable parameters of nutritional status. Specifically, a resident who was exclusively tube fed lost weight without timely interventions to prevent further weight loss. The findings were cited at a harm level. Resident identifier: 24.		
	Findings include:		
	Resident 24 was admitted to the facility on [DATE] and was readmitted on [DATE] with diagnoses that included COVID-19, schizophrenia, anxiety disorder, conversion disorder, chronic kidney disease, and cognitive communication deficit.		
	Resident 24's medical record was r	reviewed on 8/29/21.	
	Resident 24's Nutritional Assessment was reviewed. The Nutritional Assessment indicated that the facility Dietary Manager (DM) completed the assessment on 12/28/20, which was 4 days after resident 24 was readmitted. The Assessment further indicated that the facility Registered Dietitian (RD) did not review the Assessment until 1/15/21, approximately 3 weeks after resident 24 was readmitted. The Assessment indicated that resident 24 weighed 161.6 pounds (lbs). The Assessment indicated that resident 24 was receiving an enteral tube feeding of Replete with Fiber for 65 milliliters (ml) an hour for 24 hours a day. The Assessment also indicated that resident 24 had experienced a recent significant weight change. The Assessment indicated that resident 24 was not eating any food by mouth, and was exclusively tube fed due to a swallowing difficulty. The Assessment indicated that resident 24's estimated calorie needs to be between 1470 and 1838 calories a day. The Assessment indicated that resident 24's tube feeding formula would provide 1560 calories a day.		
	Resident 24's care plan was reviewed. Review of the care plan indicated that it was not developed until 1/15/21, approximately 3 weeks after resident 24 was admitted. The care plan indicated that the facility was to monitor resident 24's weights every week.		
	Review of resident 24's graphed we	eight records revealed the following we	ights:
	a. 1/3/21 - 157.1 lbs.		
	b. 2/7/21 - 155.8		
	c. 3/7/21 - 157.6

F 0732	Post nurse staffing information every day.		
Level of Harm - Minimal harm or potential for actual harm	33215		
Residents Affected - Some	Based on observation and interview, it was determined that the facility did not have the nurse staffing information posted. The facility must post the following information on a daily basis: Facility name, the current date, the resident census, and the total number and the actual hours worked by the following categories of licensed and unlicensed nursing staff directly responsible for resident care per shift: Registered nurses, Licensed practical nurses, and Certified nurse aides. The facility must post the nurse staffing data on a daily basis at the beginning of each shift. Specifically, the nurse staffing data was not posted on a daily basis and the daily resident census was not accurate.		
	Findings include:		
	On 8/29/21 at 8:21 AM, an interview was conducted with Registered Nurse (RN) 3. RN 3 stated she was not sure what the resident census was for the day but information could be located on the nurse staffing post located by the medication storage room.		
	On 8/29/21 at 8:21 AM, the nurse staffing post was observed. The nurse staffing post was dated 8/26/21, and the current census was documented as 47.		
	On 8/30/21 at 8:00 AM, the nurse staffing post was observed. The nurse staffing post was dated 8/26/21, and the current census was documented as 47.		
	On 8/31/21 at 8:00 AM, the nurse staffing post was observed. The nurse staffing post was dated 8/26/21, and the current census was documented as 47.		
	On 9/1/21 at 7:23 AM, the nurse staffing post was observed. The nurse staffing post was dated 8/26/21, and the current census was documented as 47.		
	On 9/1/21 at 9:29 AM, an interview was conducted with the Director of Nursing (DON). The DON stated the nurse staffing post was being completed by the Administrator and the Business Manager. The DON stated that recently she given the assignment of the nurse staffing post and she would have one of the Certified Nursing Assistants complete the posting. The DON further stated the night nurse that was in the facility after 11:00 PM, would complete the nurse staffing post every night. The DON stated that she relied on the night nurse to post the nurse staffing post every night.

F 0867 Level of Harm - Minimal harm or	Set up an ongoing quality assessment and assurance group to review quality deficiencies and develop corrective plans of action.		ality deficiencies and develop
potential for actual harm	22992		
Residents Affected - Some	Based on interview and record review, the facility did not ensure that the Quality Assessment and Assurance (QAA) committee developed and implemented appropriate plans of correction to correct identified quality deficiencies. Specifically, the facility was found to be in non-compliance at a harm level with F688 and F692, as well as at substandard quality of care in F679. In addition, several deficiencies were cited during the 2019 recertification survey, and again during the 2021 survey. Resident identifiers: 5, 13, 15, 17, 22, 24, 25, 27, 28, 32, 35, 36, 42, and 43		
	Findings include:		
	1. Based on interview, observation and record review, the facility did not provide, based on the comprehensive assessment and care plan and the preferences of each resident, an ongoing program to support residents in their choice of activities, both facility-sponsored group and individual activities and independent activities, designed to meet the interests of and support the physical, mental, and psychosocial well-being of each resident, encouraging both independence and interaction in the community for 14 of 30 sample residents. Resident identifiers: 5, 13, 15, 17, 22, 24, 25, 27, 28, 32, 35, 36, 42, and 43.		
	[Cross refer to F679]		
	2. Based on interview and record review, the facility did not ensure that 1 of 30 sample residents maintained acceptable parameters of nutritional status. Specifically, a resident who was exclusively tube fed lost weight without timely interventions to prevent further weight loss. The findings were cited at a harm level. Resident identifier: 24.		
	[Cross refer to F692]		
	3. Based on observations, interviews and record review it was determined the facility did not ensure a resident with limited range of motion received appropriate treatment and services to increase their range of motion and to prevent further decrease in range of motion. Specifically, a resident with documentation of a contracture to the right and left hand was not provided with treatment and services to increase their range of motion or to prevent further decrease in range of motion. This finding resulted in a harm deficiency. Resider identifier: 28.		
	,	laint survey completed on 6/9/21, the fa 880. These were cited again during the	
	5. During a recertification survey with an end date of 6/24/19, the facility was cited for non-compliance with regulations F578, F584, F609, F656, F684, F687, F689, F760, F756, F761, F842, F867, and F880. These same tags were cited on the survey completed on 9/1/21. This demonstrated the inability to maintain compliance.		1, F842, F867, and F880. These
