(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0880	Provide and implement an infection prevention and control program.			
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 39651			
Residents Affected - Many	Based on interview and record review, the facility failed to implement an effective infection control program related to the required screening of healthcare personnel (HCP) and/or visitors for COVID-19 (a highly communicable infection) for an entire month (January 2022) reviewed. These failures placed residents of the facility at risk of acquiring COVID-19 infection.			
	Findings include .			
	According to the Centers for Disease Control (CDC), COVID-19 is an illness caused by a virus (coronaviru that can spread from person to person. The CDC also stated that a person can become infected from respiratory droplets when an infected person coughs, sneezes or talks. Symptoms of COVID-19 included: Fever or chills, Cough, Shortness of breath or difficulty breathing, Fatigue, Muscle or body aches, Headach New loss of taste or smell, Sore throat, Congestion or runny nose, Nausea or vomiting and Diarrhea.			
	beginning of their shift for fever and symptoms of COVID-19. Actively take their temperature and documen absence of symptoms consistent with COVID-19.			
	 Healthcare Personnel (HCP): HCP refers to all paid and unpaid persons serving in healthcare settings who have the potential for direct or indirect exposure to patients or infectious materials, including body substances (e.g., blood, tissue, and specific body fluids); contaminated medical supplies, devices, and equipment; contaminated environmental surfaces; or contaminated air. HCP include, but are not limited to, emergency medical service personnel, nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, pharmacists, students and trainees, contractual staff not employed by the healthcare facility and persons not directly involved in patient care, but who could be exposed to infectious agents that can be transmitted in the healthcare setting (e.g., clerical, dietary, environmental services, laundry, security, engineering and facilities management, administrative, billing, and volunteer personnel). A review of the facility policy titled, [NAME] Center Policy and Procedure Screening of Staff and Visitors dated and revised on 01/2022 showed the purpose of the policy was to identify anyone entering the facility. 			
	regardless of their vaccination status, who pose risk of COVID-19 transmission to our residents and/or staff. The policy directed the facility staff to screen everyone who enters the facility for signs and symptoms of COVID-19.			
	The policy showed that the facility's screening tool would be reviewed by staff for completeness to ensure that the person being screened did not have signs or symptoms of COVID-19, had no high risk/direct unprotected exposure to COVID-19 and had been recently tested per the recent guidelines. The screening tool directed the facility staff to screeners are required to take the person's temperature, verbally ask the screening questions to both visitors and employees immediately upon entry to the facility and complete the form.
