F 0908 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	(Each deficiency must be preceded by full regulatory or LSC identifying information) Keep all essential equipment working safely. ***NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 45028 Based on interview and record review the facility failed to maintain a four wheeled walker per manufacturers guidelines. This deficient practice resulted in Resident 1 falling onto the floor after one of the front rollator wheels from her walker came off. Findings: During a review of Resident 1 's Admission Record (AR), the AR indicated Resident 1 was admitted to the facility on [DATE]. Resident 1 's diagnosis included chronic obstructive pulmonary disease (group of lung diseases that block airflow and make it difficult to breathe), right knee osteoarthritis (wearing down of protective tissue at the ends of bones occurs gradually and worsens over time), and tremor (rhythmic shaking movement in one or more parts of the body). During a review of Resident 1 's History and Physical (H&P) dated 5/6/2022, the H&P indicated Resident 1 was able to make decisions. The H&P indicated Resident 1 had a good rehabilitation potential. During a review of Resident 1 's Minimum Data Set ([MDS]), a standardized assessment and care planning tool), dated 8/12/2022, the MDS indicated Resident 1 required supervision (oversight, encouragement or cueing) for bed mobility (how resident moves between surfaces including to or from bed), walking in room (how resident walks between locations in his/her room), walking in corridor (how resident corridor on same floor), locomotion of unit (how resident moves between surfaces including to or from bed), walking in room (how resident walks between locations in his/her room), walking in corridor (how resident corridor on same floor), bocomotion of unit (how resident moves to and returns from distant areas on the floor), dressing, and toilet use (how resident uses the toilet room, cleans self after elimination). The MDS further indicated Resident 1 was not steady, but able to stabilize			
	have a policy on rollator walkers. (continued on next page)
