(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)					
F 0757	Ensure each resident's drug regimen must be free from unnecessary drugs.					
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 36395					
Residents Affected - Few	Based on interview and record review, the facility failed to ensure licensed staff did not administer Senokot (a medication used to treat constipation) to one of three sampled residents (Resident 1) who was experiencing diarrhea (loose stools, a side effect of Senokot) from 7/4 - 7/18/2022. This deficient practice of administering medications in the presence of adverse effects (unwanted, dangerous side effects of medication therapy) caused Resident 1 to experience diarrhea leading to hypotension (low blood pressure), transfer to the general acute hospital (GACH 1) emergency room (ER), where Resident 1 was diagnosed with severe dehydration (a potentially life-threatening medical emergency, can cause serious damage to your kidneys, heart, and brain) due to prolonged diarrhea, an infected Stage II decubitus bed sore (skin appears as a shallow, crater-like wound or a blister containing a clear or yellow fluid) in the sacral area (lower back), an abrasion to the scrotum, and sepsis (life threatening illness caused by the body's response to an infection) due to the Stage II decubitus bed sore. Resident 1 resided in the GACH for 10 days. Findings: A review of the admission record indicated Resident 1 was admitted to the facility on [DATE] with diagnoses including surgical amputation of the right leg below the knee (BKA), peripheral vascular disease (PVD, disease causing restricted blood flow to the legs or other body parts) and diabetes (condition that causes a person's blood sugar level to become high). A review of Resident 1's Physician's Order dated 6/29/2022 at 4:35 p.m., indicated to administer Senokot 8.6 milligrams (mg.), two tablets by mouth at bedtime for constipation and to hold for loose stools. A review of the Care Plan created on 6/30/2022, indicated Resident 1 had dehydration or potential fluid deficit related to decreased fluid intake. The care plan goal indicated Resident 4 would be free from signs and symptoms of dehydration which included headache, dizziness, fatigue, and weakness. The listed in					

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0757 Level of Harm - Actual harm Residents Affected - Few	A review of the Change in Condition (COC) note dated 7/4/2022 at 1:08 p.m., indicated Resident 1 had three episodes of diarrhea in the morning. The physician was notified and gave an order to administer Loperamide 2 mg tablets by mouth every eight hours as needed for diarrhea and infuse Normal Saline (used for fluid or electrolyte [essential minerals in that are vital in the key functions in the body] replenishment) Intravenously (IV) two liters at 50 milliliters per hour (ml/hour). According to a review of the Care Plan dated 7/4/2022, Resident 1 had episodes of diarrhea and the goal indicated Resident 1's diarrhea will resolve within 72 hours without complications. The care plan interventions included to observe and report signs and symptoms of skin breakdown, provide good peri-care, administer Loperamide 2 mg. as ordered, and report adverse reaction from the medication.			
	A review of the Bowel and Bladder Elimination (BBE) form dated 7/2022, indicated Resident 1 had episodes of diarrhea on the following dates:			
	-7/4/2022 - three episodes.			
	-7/10/2022 - one episode.			
	-7/11/2022 - three episodes.			
	-7/12/2022 - four episodes.			
	-7/13/2022 - three episodes.			
	-7/14/2022 - three episodes.			
	-7/16/2022 - three episodes.			
	-7/17/2022 - four episodes.			
	-7/18/2022 - two episodes.			
	A review of the Medication Administration Record (MAR) from 7/1 to 7/31/2022 indicated Resident 1 was administered Senokot 8.6 mg. two tablets by mouth at 9 p.m. on 7/4, 7/10, 7/11, 7/12, 7/13, 7/14 and 7/16/2022.			
	mg. tablets by mouth on 7/13/2022 3:36 p.m. However, there was no d	1/2022, the MAR indicated Resident 1 v at 2 a.m. (the same day he received the locumentation found that Resident 1 was an's order when Resident 1 had episod	ne Senokot) and on 7/17/2022 at as administered loperamide every
