(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0755	Provide pharmaceutical services to meet the needs of each resident and employ or obtain the services of a licensed pharmacist.			
Level of Harm - Immediate jeopardy to resident health or safety	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 36491			
Residents Affected - Few	Based on observation, interview, and record review, the facility failed to provide pharmaceutical services to ensure the accurate acquiring, receiving, dispensing, and administration of medications for 1 of 1 residents (Resident #1) reviewed for medication omission.			
	1. the facility failed to follow their protocol by failing to reorder a prescribed medication timely to prevent seizures, and Resident #1 missed two doses of medication, because his medication was not available and he had two back-to-back seizures and was taken to the hospital. (Clobazam (Onfi), used along with other medicines to treat seizures associated with Lennox-Gastaut syndrome, which is a severe condition characterized by repeated seizures (epilepsy) that begin early in life).			
	2. the facility did not reorder Resident #1's seizure medication until the day he went to the hospital and the facility did not notify his physician that he missed his medication.			
	An IJ was identified on 5/17/23 at 2:30 p.m. The IJ was removed on 5/18/23 at 4:20 p.m. While the IJ was removed, the facility remained out of compliance at a scope of isolated and a severity level of actual harm that is not immediate jeopardy due to the facility's need to monitor interventions and evaluate the effectiveness of the corrective systems.			
		This failure could place residents at risk of adverse medication effects and/or not receiving the therapeutic benefits of their medications, prescribed by the physician.		
	Findings included:			
	the facility 11/19/22 with diagnoses	Record review of a face sheet dated 5/16/23 indicated Resident #1 was a [AGE] year-old male admitted to the facility 11/19/22 with diagnoses of epilepsy, unspecified intellectual disabilities, attention-deficit hyperactivity disorder, mild cognitive impairment of uncertain or unknown etiology, and presence of neurostimulator.  Record review of an MDS assessment dated [DATE] indicated Resident #1 had moderate impaired cognition. He was independent with personal hygiene, and limited assistance with bathing.		
		a revision date of 03/08/23 indicated Remedication as ordered by the doctor.	esident #1 had a seizure disorder

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0755  Level of Harm - Immediate jeopardy to resident health or safety  Residents Affected - Few	During an interview on 5/16/23 at 3:15 p.m. the DON and the Compliance Nurse said LVN A had been suspended pending investigation. DON said any of the staff passing Resident #1's medications could have reordered the medication. Compliance nurse and DON confirmed Resident #1 missed his dose of Onfi on 5/12/23 and 5/13/23. The DON confirmed the dose of Onfi on 5/12/23 was signed off as being given by LVN A but had not been given, as LVN A signed the medication off prior to realizing the medication was not available. DON said someone who had been passing his meds should have checked to see if the medication had been reordered as it was very important for the resident to receive it.  During a phone interview on 5/16/23 at 3:45 p.m. LVN B was questioned about documenting a 1 which signified away from facility with meds, on the MAR on 5/14/2023 for Resident #1's dose of Onfi. LVN B said it		
	was incorrect documentation. LVN B said it was Resident #1's roommate who was actually out of the facility. LVN B said she did not know why she clicked on it (the 1). LVN B said the medication was given, and she was aware of how important this medications was.		
	During a phone interview on 5/17/23 at 12:31 p.m. the facility Medical Director said there was a small potential that missing 2 doses of Onfi could have caused Resident #1 to have a seizure but fairly unlikely.		
	During a phone interview on 5/17/23 at 1:47 p.m. the Neurologist assistant stated the physician said, if Resident #1 had missed 2 doses of his Onfi, there was the potential of that causing him to have a seizure, but Resident #1, had seizures so it was hard to say it was the cause, we will never know. The neurologist assistant said the emergency room physicians did not know Resident #1's history, and that the Neurologist had treated Resident #1 for years, and as long as Resident #1 was on his medication, he was good, and not worried about it. Assistant said labs are not drawn routinely as long as Resident #1 was stable.		
	Record review of hospital records dated 5/16/23 revealed Resident #1 was admitted to the hospital on 5/14/23 at 6:35 a.m.		
	Hospital physician documentation indicated the following: At this time it is my impression patient had a seizure from the abrupt discontinuation of clobazam (Onfi) which is a known complication.		
	Diagnoses included seizure, volume depletion, electrolyte abnormality and withdrawal from clobazam. Resident #1 was discharged back to the nursing home on 5/14/2023 9:13 a.m.  Record review of an Ordering Medications policy dated 2003 indicated the following: .reorder medication three to five days in advance of need to assure and adequate supply is on hand.		
	An Immediate Jeopardy (IJ) was id	entified on 05/17/2023 at 2:30 p.m., du	e to the above failures.
	The Administrator was notified of the	ne IJ, and the IJ template was provided	on 5/17/2023 at 3:02 p.m.
	The Plan of removal was accepted	on 5/18/2023 at 3:26 p.m., and include	ed the following:
	5/18/20224
